EDUCATION

Lovely Professional University

B.Tech in Computer Science and Engineering

Jalandhar, Punjab

Aug 2022 – May 2026

- **Relevant Coursework:** Artificial Intelligence, Machine Learning, NLP, Deep Learning, Data Structures, Algorithms, DBMS, Statistical Analysis

EXPERIENCE

AI Intern

Know AI

June 2026 – Present

Ahmedabad, Gujarat

- Develop Generative AI applications using Python, LLMs, AI frameworks, and evaluation pipelines.
- Build agentic AI workflows integrating LLMs with applications, tools, APIs, and automation services.
- Design RAG pipelines using embeddings, vector retrieval, NLP, and structured data processing.
- Implement prompt engineering, agent evaluation, experimentation, and performance optimization workflows.
- Develop and test AI solutions with monitoring, debugging, and deployment optimization for reliability.

Data Engineer Intern

flickDone

June 2025 – Aug 2025

Remote (South Korea-based company)

- Built scalable Python and SQL data pipelines processing 50,000+ records for analytics and AI workflows.
- Developed ETL pipelines for data ingestion, preprocessing, validation, transformation, and automation.
- Built data workflows supporting machine learning applications and reliable AI-ready datasets.
- Implemented automated validation and processing workflows for consistent analytical data quality.
- Contributed to REST APIs and CI/CD workflows using GitHub, Docker, and Linux deployments.

PROJECTS

Morning Market Brief | Python, OpenAI API, LangGraph, Multi-Agent AI

Jun 2024 – Aug 2024

- Built a multi-agent AI assistant using Python and OpenAI APIs for financial information processing and summarization.
- Designed agentic workflows for information analysis, reasoning, summarization, and response generation.
- Implemented execution logging and workflow monitoring for debugging, evaluation, and performance tracking.
- Developed automated AI workflows for processing information and generating context-aware responses.

Regulatory Compliance RAG Assistant | Python, LangChain, Hugging Face, ChromaDB

Apr 2026 – Jun 2026

- Built a Generative AI assistant using Python, Hugging Face, LangChain, and ChromaDB for document workflows.
- Implemented RAG pipelines using NLP, embeddings, semantic search, and vector retrieval.
- Designed context-aware workflows generating responses from retrieved domain-specific information.
- Implemented evaluation workflows to validate retrieval quality, responses, and AI outputs.

AI Product Recommendation System | Python, FastAPI, LangChain, Docker

Jun 2025 – Aug 2025

- Built a Generative AI recommendation application using Python, FastAPI, LangChain, and scalable data workflows.
- Developed AI workflows integrating LLM-based recommendations with backend applications and APIs.
- Implemented data processing and prompt-driven workflows for personalized AI-generated recommendations.
- Containerized AI services using Docker for reproducible deployment and scalable application environments.

TECHNICAL SKILLS

Languages: Python, Java, SQL

Machine Learning: Machine Learning, Deep Learning, NLP, Computer Vision, Predictive Modeling, Model Evaluation

Frameworks: PyTorch, Scikit-learn, Hugging Face, FastAPI

Data: Pandas, NumPy, PostgreSQL, MySQL, Feature Engineering, Data Pipelines

ML Engineering: Model Training, Model Inference, Experimentation, Error Analysis, Performance Optimization

Generative AI: LLMs, RAG, Agentic AI, AI Agents, Embeddings, Semantic Search

Tools: Git, Docker, Linux, GitHub Actions
