EDUCATION

Lovely Professional University

B.Tech in Computer Science and Engineering

Jalandhar, Punjab

Aug 2022 – May 2026

- **Relevant Coursework:** Data Structures, Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks, Distributed Systems, Software Engineering

EXPERIENCE

AI Intern

Know AI

June 2026 – Present

Ahmedabad, Gujarat

- Develop production AI applications using Python, REST APIs, backend services, and structured data workflows.
- Build API-driven services integrating AI workflows with applications, tools, databases, and automation systems.
- Implement backend workflows with testing, debugging, monitoring, and performance optimization for reliability.
- Collaborate on application development, code changes, testing, and deployment workflows using Git and Docker.
- Develop and iterate on software components based on testing results, technical requirements, and feedback.

Data Engineer Intern

flickDone

June 2025 – Aug 2025

Remote (South Korea-based company)

- Built scalable Python and SQL data pipelines processing 50,000+ records for production analytics workflows.
- Developed ETL services for data ingestion, preprocessing, validation, transformation, and automated processing.
- Optimized PostgreSQL and MySQL queries, indexing, and data retrieval for application performance.
- Built automated validation workflows improving data reliability and reducing defects in downstream processing.
- Contributed to REST APIs and CI/CD workflows using GitHub, Docker, and Linux deployments.

PROJECTS

AI Product Recommendation System | Python, SQL, FastAPI, Docker

Jun 2025 – Aug 2025

- Built a backend application using Python, FastAPI, SQL, and scalable data workflows for product recommendations.
- Developed REST APIs integrating recommendation workflows with backend applications and data services.
- Implemented data processing, validation, and application workflows for reliable recommendation generation.
- Containerized backend services using Docker for reproducible development and deployment environments.

Morning Market Brief | Python, OpenAI API, LangGraph, Docker

Jun 2024 – Aug 2024

- Built a Python application for financial information processing, summarization, and automated response generation.
- Designed modular workflows for information processing, reasoning, summarization, and response generation.
- Implemented execution logging and monitoring for debugging, testing, and application performance tracking.
- Containerized application services using Docker for reproducible development and deployment workflows.

Regulatory Compliance RAG Assistant | Python, FastAPI, LangChain, ChromaDB

Apr 2026 – Jun 2026

- Built a Python application for document processing using LangChain, Hugging Face, and ChromaDB.
- Implemented document ingestion, preprocessing, embeddings, semantic search, and retrieval workflows.
- Designed application workflows with evaluation and monitoring to improve reliability and response quality.
- Tested application components and optimized processing workflows for consistent system performance.

TECHNICAL SKILLS

Languages: Python, Java, C++, JavaScript, SQL

Computer Science: Data Structures, Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Backend: FastAPI, REST APIs, PostgreSQL, MySQL, API Development

Software Engineering: Testing, Debugging, Code Reviews, CI/CD, Performance Optimization

AI/ML: Machine Learning, NLP, Deep Learning, LLMs, RAG

Data: Pandas, NumPy, Data Pipelines, ETL, Feature Engineering

Tools: Git, GitHub, Docker, Linux, GitHub Actions
