EDUCATION

Lovely Professional University

B.Tech in Computer Science and Engineering

Jalandhar, Punjab

Aug 2022 – May 2026

- **Relevant Coursework:** Data Structures, Algorithms, Operating Systems, DBMS, Computer Networks, Artificial Intelligence, Machine Learning, Distributed Systems, Computer Architecture

EXPERIENCE

AI Intern

Know AI

June 2026 – Present

Ahmedabad, Gujarat

- Built AI automation workflows using Python, LLMs, embeddings, and intelligent processing pipelines for business applications.
- Developed backend services and REST APIs supporting AI agents, workflow automation, and internal application systems.
- Designed data pipelines for information extraction, retrieval workflows, and AI-powered operational processes.
- Implemented evaluation, monitoring, testing, and optimization workflows for reliable AI system deployments.
- Integrated LLM-based components to automate repetitive workflows and improve application efficiency.

Data Engineer Intern

flickDone

June 2025 – Aug 2025

Remote (South Korea-based company)

- Built scalable data pipelines processing 50,000+ records using Python (NumPy, Pandas), SQL, and automation workflows.
- Developed ETL pipelines for data ingestion, validation, transformation, and structured application workflows.
- Optimized PostgreSQL and MySQL queries improving database performance and data retrieval efficiency.
- Created automated validation workflows improving reliability of analytics and AI application datasets.
- Developed REST APIs and Docker-based deployment workflows using GitHub and Linux environments.

PROJECTS

Regulatory Compliance RAG Assistant | Python, LangChain, Hugging Face

Apr 2026 – Jun 2026

- Built an LLM-powered RAG system using Python, LangChain, Hugging Face, and ChromaDB for knowledge automation.
- Implemented semantic search pipelines using embeddings, transformer models, and vector databases for retrieval workflows.
- Developed evaluation pipelines improving response quality, reliability, and AI system performance.
- Created monitoring workflows for testing and validating production AI application behavior.

AI Recommendation System | Python, FastAPI, Docker, LangChain, Prisma

Jun 2025 – Aug 2025

- Built an AI recommendation platform using LLM workflows, FastAPI services, and automated decision pipelines.
- Designed backend APIs and data processing workflows supporting AI-powered recommendations and integrations.
- Integrated structured data processing and AI components for scalable application development.
- Containerized services using Docker for reliable deployment and reproducible environments.

Morning Market Brief | Python, OpenAI API, Docker, Multi-Agent AI

Jun 2024 – Aug 2024

- Built a multi-agent AI system for automated information processing, reasoning, and workflow automation.
- Integrated OpenAI APIs for LLM-based summarization, analysis, and intelligent automation workflows.
- Implemented execution logging, monitoring, and performance tracking for AI operations.
- Developed Docker-based deployments for scalable AI services and automation pipelines.

TECHNICAL SKILLS

Languages: Python, Java, C/C++, SQL (PostgreSQL), JavaScript

AI/ML: Large Language Models, AI Agents, RAG, Embeddings, Prompt Engineering, Model Evaluation

Frameworks: FastAPI, Flask, React, Node.js, LangChain, Scikit-learn

Developer Tools: Git, Docker, GitHub Actions, Linux, Azure OpenAI, Azure Blob Storage

Libraries: PyTorch, Hugging Face Transformers, Pandas, NumPy, ChromaDB
