EDUCATION

Lovely Professional University

B.Tech in Computer Science and Engineering

Jalandhar, Punjab

Aug 2022 – May 2026

- **Relevant Coursework:** Data Structures, Algorithms, Operating Systems, DBMS, Computer Networks, Artificial Intelligence, Machine Learning, Distributed Systems, Computer Architecture

EXPERIENCE

AI Engineer Intern

Know AI

June 2026 – Present

Ahmedabad, Gujarat

- Built production RAG applications using Python, FastAPI, LLM APIs, embeddings, and retrieval workflows.
- Developed grounded AI services integrating documents, vector databases, and scalable retrieval pipelines.
- Designed chunking, indexing, embedding, and evaluation pipelines improving AI response accuracy.
- Implemented monitoring, validation, testing, and failure analysis workflows for reliable AI systems.
- Built LangChain agents using tool orchestration, prompt engineering, and automated AI workflows.

Data Engineer Intern

flickDone

June 2025 – Aug 2025

Remote (South Korea-based company)

- Built scalable ETL pipelines processing 50,000+ records using Python, Pandas, NumPy, and SQL.
- Developed document processing, data transformation, and embedding pipelines supporting AI applications.
- Optimized PostgreSQL and MySQL queries improving backend performance and data accessibility.
- Created validation workflows improving data quality for machine learning and AI systems.
- Developed REST APIs and deployed services using Docker, Git, GitHub Actions, and Linux.

PROJECTS

Regulatory Compliance RAG Assistant | Python, LangChain, Hugging Face, ChromaDB Apr 2026 – Jun 2026

- Built grounded RAG system using LangChain, embeddings, and vector databases for document retrieval.
- Implemented chunking, indexing, retrieval pipelines, and FastAPI services for LLM applications.
- Developed evaluation sets measuring retrieval quality, accuracy, and response reliability metrics.
- Applied prompt optimization and grounding techniques reducing unreliable AI responses.

Smart Traffic AI Surveillance System | Python, YOLO, OpenCV, FastAPI, AWS

Jun 2025 – Aug 2025

- Built computer vision AI system using YOLO, OpenCV, and Python for detection workflows.
- Developed scalable inference pipelines supporting automated analysis and AI decision systems.
- Integrated FastAPI services for AI deployment and backend product integration.
- Containerized AI services using Docker and AWS for production deployment workflows.

Morning Market Brief | Python, OpenAI API, Docker, Multi-Agent AI

Jun 2024 – Aug 2024

- Built multi-agent AI assistant using LLM APIs for reasoning and workflow execution.
- Integrated OpenAI APIs with prompts, tools, and automated decision workflows.
- Implemented logging, evaluation, monitoring, and testing for AI reliability.
- Developed Docker deployments for scalable AI services and backend operations.

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript, TypeScript, Java, C/C++

AI/ML: Large Language Models, RAG, AI Agents, Generative AI, Prompt Engineering, Embeddings, Model Evaluation, Grounding

Frameworks: LangChain, PyTorch, FastAPI, TensorFlow, Hugging Face Transformers, OpenCV, Scikit-learn

Data & APIs: REST APIs, Vector Databases, PostgreSQL, MySQL, Pandas, NumPy, Retrieval Pipelines

Cloud & MLOps: AWS, Docker, Git, GitHub Actions, Linux, CI/CD, Deployment, Monitoring

Engineering: Backend Development, Agent Workflows, Production AI Systems, Data Structures, Algorithms, Problem Solving
