EDUCATION

Lovely Professional University

B.Tech in Computer Science and Engineering

Jalandhar, Punjab

Aug 2022 – May 2026

- **Relevant Coursework:** Data Structures, Algorithms, Operating Systems, DBMS, Computer Networks, Artificial Intelligence, Machine Learning, Distributed Systems, Computer Architecture

EXPERIENCE

AI Intern

Know AI

June 2026 – Present

Ahmedabad, Gujarat

- Built scalable AI workflows using Python, machine learning models, embeddings, and evaluation pipelines for AI applications.
- Developed backend microservices and REST APIs supporting LLM workflows, automation, and AI-driven data processing.
- Designed scalable data pipelines using structured processing, feature engineering, and information retrieval techniques.
- Performed AI model evaluation through testing, validation, error analysis, benchmarking, and performance optimization.
- Improved AI system reliability through debugging, monitoring, testing, and scalable deployment workflows.

Data Engineer Intern

flickDone

June 2025 – Aug 2025

Remote (South Korea-based company)

- Built scalable data pipelines processing 50,000+ records using Python (NumPy, Pandas), SQL, and data processing workflows.
- Designed ETL pipelines for data ingestion, validation, transformation, and automated machine learning workflows.
- Optimized PostgreSQL and MySQL queries improving database performance, indexing, and data retrieval efficiency.
- Built automated validation frameworks ensuring reliable datasets for analytics and AI model development.
- Developed REST APIs and contributed to Docker-based CI/CD workflows using GitHub and Linux environments.

PROJECTS

Regulatory Compliance RAG Assistant | *Python, LangChain, Hugging Face*

Apr 2026 – Jun 2026

- Built a retrieval-augmented generation system using Python, LangChain, Hugging Face, and ChromaDB.
- Implemented semantic search using vector embeddings, transformer models, and information retrieval algorithms.
- Optimized AI pipelines through evaluation, benchmarking, performance analysis, and response improvements.
- Developed monitoring workflows for model validation, testing, and inference performance evaluation.

AI Recommendation System | *Python, FastAPI, Docker, LangChain, Prisma*

Jun 2025 – Aug 2025

- Built an AI recommendation system using Python, FastAPI, and LangChain-based AI workflows.
- Integrated data pipelines and Prisma for scalable backend processing and API-driven applications.
- Developed REST APIs supporting recommendation workflows, model integration, and system scalability.
- Containerized applications using Docker for reliable deployment and scalable AI services.

Morning Market Brief | *Python, OpenAI API, Docker, Multi-Agent AI*

Jun 2024 – Aug 2024

- Built a data-driven AI system for automated information processing and analysis workflows.
- Integrated OpenAI APIs for intelligent summarization, reasoning, and LLM-based insights.
- Implemented workflow monitoring with execution logging, benchmarking, and performance tracking mechanisms.
- Containerized services using Docker for scalable AI deployments and automation workflows.

TECHNICAL SKILLS

Languages: Python, Java, C/C++, SQL (PostgreSQL), JavaScript

Frameworks: FastAPI, Flask, React, Node.js, Scikit-learn, LangChain

Developer Tools: Git, Docker, GitHub Actions, Linux, Azure OpenAI, Azure Blob Storage

Libraries: PyTorch, Hugging Face Transformers, Pandas, NumPy
