EDUCATION

Lovely Professional University

B.Tech in Computer Science and Engineering

Jalandhar, Punjab

Aug 2022 – May 2026

- **Relevant Coursework:** Artificial Intelligence, Machine Learning, NLP, Deep Learning, Data Structures, Algorithms, DBMS, Distributed Systems

EXPERIENCE

AI Intern

Know AI

June 2026 – Present

Ahmedabad, Gujarat

- Develop AI/ML and Generative AI systems using Python, LLMs, RAG pipelines, and modern AI frameworks.
- Build evaluation workflows for model behavior, retrieval quality, response reliability, and system performance.
- Develop data and AI pipelines for preprocessing, embeddings, retrieval, experimentation, and validation.
- Analyze model outputs and failure cases to identify inconsistencies and improve AI system reliability.
- Deploy and monitor AI services using Docker, Git, Linux, REST APIs, and production workflows.

Data Engineer Intern

flickDone

June 2025 – Aug 2025

Remote (South Korea-based company)

- Built scalable Python and SQL data pipelines processing 50,000+ records for analytics and machine learning workflows.
- Designed ETL pipelines for data ingestion, preprocessing, validation, transformation, and automation.
- Implemented automated data validation workflows to identify inconsistencies and improve dataset reliability.
- Built data workflows supporting machine learning applications, experimentation, and analytical systems.
- Contributed to REST APIs and CI/CD workflows using GitHub, Docker, and Linux environments.

PROJECTS

Regulatory Compliance RAG Assistant | Python, FastAPI, LangChain, Hugging Face, ChromaDB

Apr 2026 – Jun 2026

- Built a Generative AI system for document intelligence using Python, LangChain, Hugging Face, and ChromaDB.
- Implemented RAG pipelines covering document processing, embeddings, semantic search, and vector retrieval.
- Designed evaluation workflows to measure retrieval quality, response reliability, and model behavior.
- Analyzed retrieval failures and response inconsistencies to improve context quality and system performance.

AI Product Recommendation System | Python, FastAPI, LangChain, Docker

Jun 2025 – Aug 2025

- Built an AI recommendation system using Python, FastAPI, LangChain, and scalable data processing workflows.
- Developed data pipelines for preprocessing, feature preparation, embeddings, and recommendation workflows.
- Implemented backend APIs and validation workflows for reliable AI outputs and application integration.
- Containerized AI services using Docker for reproducible experimentation and deployment environments.

Morning Market Brief | Python, OpenAI API, LangGraph, Docker

Jun 2024 – Aug 2024

- Built a Python-based multi-agent system for automated financial information processing and summarization.
- Designed agent workflows for information gathering, reasoning, task execution, and response generation.
- Implemented execution logging and monitoring to analyze agent behavior, failures, and workflow performance.
- Containerized AI services using Docker for reproducible experimentation and deployment workflows.

TECHNICAL SKILLS

Languages: Python, SQL, Java, C++

AI/ML: Machine Learning, Deep Learning, LLMs, Generative AI, Model Evaluation, Experimentation

Agentic AI: Agent Workflows, LangGraph, LangChain, Prompt Engineering, RAG, Embeddings, Vector Search

Data: Pandas, NumPy, PostgreSQL, MySQL, Data Pipelines, Data Preprocessing, ETL, Data Validation

Frameworks: PyTorch, Scikit-learn, Hugging Face, FastAPI, LangChain, LangGraph

Research Engineering: Evaluation, Benchmarking, Experimentation, Failure Analysis, Metrics, Validation, Monitoring

Engineering: REST APIs, Testing, CI/CD, Docker, Git, Linux, GitHub Actions
