

EDUCATION

Lovely Professional University
Bachelor of Technology (Computer Science & Engineering)

Jalandhar, India
July 2022 - May 2026

SKILLS SUMMARY

- **Programming:** Python, SQL
- **Machine Learning:** Deep Learning, Neural Networks, Model Training, Model Evaluation, Performance Optimization
- **Data:** Pandas, Data Processing Pipelines, Dataset Preparation, Data Validation
- **Computer Vision:** Computer Vision Fundamentals, Image Processing
- **Frameworks:** PyTorch, Hugging Face, Transformers
- **Deployment:** Model Inference, Model Deployment, Docker, REST APIs
- **Engineering:** Git, GitHub, Debugging

WORK EXPERIENCE

- AI Intern | Know AI | [LINK](#)June 2026- Present
 - Developed production ML applications using Python, PyTorch, Hugging Face, Transformers, and deep learning models.
 - Built backend services and REST APIs supporting model inference, scalable ML workflows, and deployment.
 - Designed ML pipelines integrating embeddings, vector databases, and retrieval systems to improve model reliability.
 - Built scalable AI workflows using model inference, evaluation pipelines, and automation techniques.
 - Conducted model evaluation, AI output validation, debugging, and performance optimization to improve AI reliability.
- Data Engineer Intern | flickDONE | [LINK](#)June 2025- August 2025
 - Built scalable ML data pipelines processing 50,000+ samples for training, validation, and text classification workflows.
 - Engineered automated preprocessing and tokenization workflows, reducing manual verification by **70%**.
 - Optimized AWS-based ML pipelines, improving execution speed by **25%** through bottleneck analysis.
 - Developed reusable AI workflows for conversational AI, document processing, and business automation.
 - Collaborated with engineering teams to improve scalability, reliability, and maintainability of ML systems.

PROJECTS

- Regulatory Compliance RAG Assistant | [LINK](#)April 26- June 2026
 - Built an end-to-end ML pipeline using Python, PyTorch, Hugging Face models, embeddings, and vector retrieval systems.
 - Designed asynchronous retrieval architecture, improving semantic search efficiency by 50%.
 - Developed modular retrieval and inference pipelines, reducing end-to-end latency by 50%.
 - Improved zero-shot fraud detection accuracy by 30% through model evaluation and AI output validation.
- AI Search & Recommendation Platform | [LINK](#)June 25- August 2025
 - Designed a deep learning-based semantic search platform supporting intelligent retrieval and recommendation workflows.
 - Built scalable FastAPI REST APIs for AI inference and orchestration workflows.
 - Integrated Databricks infrastructure, reducing AI routing latency by **35%**.
 - Containerized services with Docker, improving deployment reliability and scalability by **25%**.
- Morning Market Brief | [LINK](#)June 24- August 2024
 - Built automated AI workflows integrating OpenAI APIs for financial news summarization.
 - Designed embedding generation and vector indexing pipelines, reducing ingestion latency by 45%.
 - Implemented prompt validation, output evaluation, and quality checks, improving LLM reliability and workflow transparency.
 - Dockerized application components for reproducible deployment and scalable AI automation.

CERTIFICATES

- Python, Data Science & ML (Cipherschools) | [CERTIFICATE](#)August 2024
 - Built ML models using PyTorch.
 - Developed Dockerized environments supporting reproducible experimentation and deployment.
- Generative AI with LLMs (Coursera) | [CERTIFICATE](#)March 2024
 - Applied prompt engineering techniques for production LLM applications.
 - Built retrieval workflows, AI output evaluation, and RAG pipeline performance validation.
