EDUCATION

Lovely Professional University

B.Tech in Computer Science and Engineering

Jalandhar, Punjab

Aug 2022 – May 2026

- **Relevant Coursework:** Artificial Intelligence, Machine Learning, NLP, Deep Learning, Data Structures, Algorithms, DBMS, Distributed Systems

EXPERIENCE

AI Intern

June 2026 – Present

Know AI

Ahmedabad, Gujarat

- Develop AI/ML and Generative AI applications using Python, LLMs, RAG pipelines, and modern AI frameworks.
- Build production-oriented AI services and REST APIs using FastAPI for automated business workflows.
- Develop LLM workflows using prompt engineering, embeddings, vector retrieval, and context management.
- Implement evaluation, testing, monitoring, and performance optimization to improve AI system reliability.
- Deploy AI services using Docker and Git while supporting scalable, production-focused engineering workflows.

Data Engineer Intern

June 2025 – Aug 2025

flickDone

Remote (South Korea-based company)

- Built scalable Python and SQL data pipelines processing 50,000+ records for analytics and machine learning workflows.
- Developed ETL pipelines for data ingestion, preprocessing, validation, transformation, and automated processing.
- Built reliable data workflows supporting machine learning applications and downstream business analytics.
- Implemented automated validation and processing workflows to improve data quality, consistency, and reliability.
- Contributed to REST APIs and CI/CD workflows using GitHub, Docker, and Linux development environments.

PROJECTS

Regulatory Compliance RAG Assistant | Python, FastAPI, LangChain, Hugging Face, ChromaDB

Apr 2026 – Jun 2026

- Built a Generative AI assistant for document-intensive workflows using Python, LangChain, Hugging Face, and ChromaDB.
- Implemented RAG pipelines using document processing, embeddings, semantic search, and vector database retrieval.
- Developed context-aware LLM workflows to generate reliable responses from domain-specific information.
- Implemented evaluation and monitoring workflows to measure retrieval quality and improve response reliability.

AI Product Recommendation System | Python, FastAPI, LangChain, Docker

Jun 2025 – Aug 2025

- Built an AI recommendation system using Python, FastAPI, LangChain, and scalable data processing workflows.
- Developed backend APIs integrating AI workflows with applications, services, and structured data systems.
- Implemented embeddings, prompt engineering, and data processing for personalized recommendations.
- Containerized AI services using Docker for reproducible development and deployment.

Morning Market Brief | Python, OpenAI API, LangGraph, Docker

Jun 2024 – Aug 2024

- Built a Python-based AI application for automated financial information processing, analysis, and summarization.
- Designed agent workflows for information analysis, reasoning, summarization, and response generation.
- Implemented execution logging and monitoring for debugging, evaluation, and application reliability.
- Containerized AI services using Docker for reproducible deployment and automated workflows.

TECHNICAL SKILLS

Languages: Python, SQL, Java, C++

Machine Learning: Machine Learning, Deep Learning, Predictive Modeling, Model Development, Model Evaluation

Generative AI: LLMs, RAG, Embeddings, Vector Search, Prompt Engineering, Agentic AI

Frameworks: PyTorch, Scikit-learn, LangChain, LangGraph, Hugging Face, FastAPI

Data: Pandas, NumPy, PostgreSQL, MySQL, Feature Engineering, Data Preprocessing, ETL

AI Engineering: AI Applications, Model Validation, Testing, Monitoring, REST APIs, CI/CD, Docker, MLOps, LLMOps

Tools: Git, GitHub Actions, Linux, Docker
