EDUCATION

Lovely Professional University
Bachelor of Technology (Computer Science & Engineering)

Jalandhar, India
July 2022 - May 2026

SKILLS SUMMARY

- **Programming:** Python, JavaScript, TypeScript, SQL, Data Structures & Algorithms
- **Software Engineering:** Software Development, Data Structures & Algorithms, Unit Testing, Integration Testing, Debugging, Code Reviews, Refactoring, Performance Optimization
- **AI & Search:** Information Retrieval, RAG, Embeddings, Vector Databases, Semantic Search
- **Backend:** FastAPI, RESTful APIs, API Integration, PostgreSQL, JSON
- **Infrastructure:** AWS, Docker, Kubernetes, CI/CD, Monitoring, Observability

WORK EXPERIENCE

AI Intern | Know AI | [LINK](#) June 2026 - August 2026

- Built Generative AI and LLM applications using Python, focusing on prompt engineering, output validation, and evaluation.
- Developed and tested **LLM-powered AI workflows and REST APIs**, integrating tool calling, automation, and RAG.
- Designed **information retrieval pipelines** using embeddings, vector databases, and semantic search.
- Developed LLM and agent evaluation pipelines measuring accuracy, reliability, tool performance, and output quality.
- Improved AI reliability through testing, monitoring, troubleshooting, debugging, latency optimization, and failure handling.

Data Engineer Intern | flickDONE | [LINK](#) June 2025 - August 2025

- Built scalable Python AI/ML data pipelines processing 50,000+ records for preprocessing and feature engineering.
- Engineered automated **data preprocessing and validation workflows**, reducing manual verification by 70%.
- Optimized AWS-based AI/ML pipelines, improving execution speed by 25% through performance tuning.
- Developed reusable AI workflows for document processing, LLM applications, API integrations, and enterprise automation.
- Collaborated with teams to build scalable AI/ML workflows and improve system reliability and deployment.

PROJECTS

Ledgerly — Multi-Tenant SaaS Billing Platform | [LIVE](#) April 2026 - September 2026

- Built a full-stack SaaS platform using Next.js, NestJS, PostgreSQL, Docker, REST APIs, and testing.
- Implemented tenant-isolated customer and invoice workflows with **RBAC and transactional data operations**.
- Built **Stripe payment workflows and webhook processing** with idempotency and transactional updates.
- Added **rate limiting, health checks, and secure error handling** for production-grade reliability.
- Developed **174 automated tests across 21 suites** covering authentication, billing, payments, and tenant isolation.

LangGraph Workflow Orchestrator — Agentic AI Platform | [LIVE](#) August 2025

- Built and deployed a stateful **Agentic AI platform** using Python, LangGraph, LangChain, FastAPI, and Gemini.
- Designed **multi-step agentic workflows** with planning, task routing, tool execution, failure handling, and recovery.
- Developed modular components for **task decomposition, tool calling, function calling, and agent coordination**.
- Exposed AI workflows through FastAPI REST APIs, enabling scalable deployment and integration with external services.
- Evaluated agent workflows using evaluation datasets, multi-turn scenarios, failure analysis, and performance benchmarking.

Production-Grade RAG Engine | [LIVE](#) June 2024 - August 2024

- Built an end-to-end production-grade RAG system using Python, FastAPI, LangChain, Qdrant, and AWS.
- Developed document preprocessing, chunking, embeddings, indexing, retrieval, and response generation pipelines.
- Implemented **semantic information retrieval with Qdrant** for low-latency, knowledge-grounded search.
- Added reranking and retrieval evaluation to improve retrieval quality, context relevance, and AI response performance.
- Improved AI service reliability through testing, monitoring, fallback handling, and error analysis.

CERTIFICATES

Python, Data Science & ML (Cipherschools) | [CERTIFICATE](#) August 2024

- Built machine learning models using PyTorch and applied ML techniques for model development and evaluation.
- Developed **Dockerized environments** supporting reproducible experimentation and deployment

Generative AI with Large Language Models (Coursera) | [CERTIFICATE](#) March 2024

- Applied prompt engineering techniques for LLM applications.
- Built **retrieval workflows, AI output evaluation, and RAG pipeline** performance validation.
