SUMMARY

Software Engineer with hands-on experience building Python services, REST APIs, data pipelines, automation workflows, and AI applications using Python, SQL, FastAPI, Docker, AWS, Git, Linux, and CI/CD. Experienced in debugging, monitoring, logging, testing, database workflows, and production-oriented systems with strong interest in cloud infrastructure, distributed systems, and SRE practices.

EDUCATION

Lovely Professional University

B.Tech in Computer Science and Engineering

Jalandhar, Punjab

Aug 2022 – May 2026

- **Relevant Coursework:** Data Structures, Algorithms, DBMS, Operating Systems, Computer Networks, Distributed Systems, AI, ML

EXPERIENCE

AI Intern

Know AI

June 2026 – Present

Ahmedabad, Gujarat

- Built Python backend services, REST APIs, AI workflows, and automation pipelines using FastAPI, Git, and Linux.
- Implemented logging, monitoring, testing, debugging, and evaluation workflows to improve application reliability.
- Integrated external APIs and data services while troubleshooting failures across applications, APIs, and data pipelines.
- Used Docker and CI/CD practices to support reproducible development, testing, and deployment workflows.

Data Engineer Intern

flickDone

June 2025 – Aug 2025

Remote

- Built Python and SQL data pipelines processing 50,000+ records for machine learning applications.
- Developed automated ingestion, transformation, validation, and data quality workflows using Pandas, NumPy, and SQL.
- Built backend workflows using Docker, Git, Linux, REST APIs, and software engineering practices.
- Implemented GitHub Actions and CI/CD automation to improve deployment reliability and developer efficiency.

PROJECTS

Morning Market Brief | *Python, OpenAI API, LangGraph, Docker*

Jun 2024 – Aug 2024

- Built a Python-based multi-agent application with API integrations, automated workflows, and structured task execution.
- Implemented logging, testing, monitoring, and error-handling workflows for reliable application operation.
- Containerized the application with Docker for reproducible development and deployment.
- Integrated LLM tooling to explore AI-assisted workflows for developer productivity.

Regulatory Compliance RAG Assistant | *Python, LangChain, Hugging Face, ChromaDB*

Apr 2026 – Jun 2026

- Built a Python RAG service with document ingestion, vector search, retrieval, and LLM inference workflows.
- Implemented data processing, embeddings, indexing, retrieval, and evaluation pipelines.
- Added logging and evaluation workflows to analyze application behavior and response quality.
- Worked with vector databases and backend components to support scalable AI application workflows.

Smart Traffic AI Surveillance System | *Python, YOLO, OpenCV, FastAPI, AWS*

Jun 2025 – Aug 2025

- Built real-time Python computer vision services using YOLO and OpenCV for automated object detection.
- Developed FastAPI REST endpoints, preprocessing, inference, and model-serving workflows.
- Containerized services with Docker and integrated AWS for cloud-based deployment.
- Debugged application workflows and optimized backend components for reliable AI service execution.

TECHNICAL SKILLS

Languages: Python, Go, SQL, Java, JavaScript, C/C++

Cloud/Infrastructure: AWS, Docker, Kubernetes, Terraform

SRE/DevOps: Linux, Git, GitHub Actions, CI/CD, Monitoring, Logging, Debugging, Automation

Backend: FastAPI, REST APIs, API Integration, Distributed Systems, Testing

Databases: PostgreSQL, MySQL, SQL, ChromaDB, Vector Databases

AI/ML: PyTorch, Hugging Face, LLMs, RAG, OpenAI API, LangChain, LangGraph
