EDUCATION

Lovely Professional University

B.Tech in Computer Science and Engineering

Jalandhar, Punjab

Aug 2022 – May 2026

- **Relevant Coursework:** Artificial Intelligence, Machine Learning, NLP, Deep Learning, Data Structures, Algorithms, DBMS, Distributed Systems

EXPERIENCE

AI Intern

Know AI

June 2026 – Present

Ahmedabad, Gujarat

- Develop AI/ML and Generative AI applications using Python, LLMs, RAG pipelines, and modern AI frameworks.
- Build scalable backend services, REST APIs, AI workflows, and microservices for production AI applications.
- Develop retrieval pipelines using embeddings, vector databases, semantic search, LangChain, and AI agents.
- Build evaluation workflows for retrieval quality, response reliability, model behavior, and system performance.
- Deploy and monitor AI services using Docker, Git, Linux, CI/CD, and production engineering practices.

Data Engineer Intern

flickDone

June 2025 – Aug 2025

Remote (South Korea-based company)

- Built scalable Python and SQL data pipelines processing 50,000+ records for analytics and machine learning workflows.
- Designed ETL pipelines for data ingestion, preprocessing, validation, transformation, and automation.
- Developed backend data services and APIs supporting reliable data processing and AI application workflows.
- Implemented automated validation, testing, and monitoring workflows improving data quality and system reliability.
- Contributed to REST APIs and CI/CD workflows using GitHub, Docker, and Linux environments.

PROJECTS

Regulatory Compliance RAG Assistant | Python, FastAPI, LangChain, Hugging Face, ChromaDB

Apr 2026 – Jun 2026

- Built a Generative AI application for enterprise document intelligence using Python, LangChain, Hugging Face, and ChromaDB.
- Implemented RAG pipelines covering document processing, embeddings, semantic search, and vector retrieval.
- Developed FastAPI services integrating retrieval, LLM inference, and backend APIs for AI workflows.
- Designed evaluation workflows to measure retrieval quality, response reliability, and system performance.

AI Product Recommendation System | Python, FastAPI, LangChain, Docker

Jun 2025 – Aug 2025

- Built an AI recommendation application using Python, FastAPI, LangChain, and scalable data processing workflows.
- Developed backend APIs and data pipelines for preprocessing, embeddings, recommendation, and retrieval workflows.
- Implemented evaluation and validation workflows to improve recommendation quality and AI output reliability.
- Containerized AI services using Docker for reproducible experimentation and deployment environments.

Morning Market Brief | Python, OpenAI API, LangGraph, Docker

Jun 2024 – Aug 2024

- Built a Python-based multi-agent system for automated financial information processing and task execution.
- Designed agentic workflows integrating LLMs, tools, APIs, reasoning, and structured response generation.
- Implemented execution logging and evaluation to analyze model behavior, failures, and workflow performance.
- Containerized AI services using Docker for reproducible experimentation and deployment workflows.

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript, TypeScript, Java, C/C++

AI/ML: Artificial Intelligence, Machine Learning, Deep Learning, Large Language Models, AI Agents, Generative AI, RAG, Embeddings, Model Evaluation

Frameworks: PyTorch, FastAPI, LangChain, LangGraph, Hugging Face Transformers, OpenCV, Scikit-learn

Systems & APIs: REST APIs, Backend Services, AI Microservices, Data Pipelines, Semantic Search, Vector Databases, PostgreSQL, MySQL, ChromaDB

Cloud & DevOps: AWS, Docker, Git, GitHub Actions, Linux, CI/CD, Cloud Deployment, Monitoring, Observability, Automation

Engineering: AI Application Development, System Design, Model Inference, Retrieval Systems, Software Testing, Debugging, Distributed Systems, Data Structures, Algorithms
