EDUCATION

Lovely Professional University

B.Tech in Computer Science and Engineering

Jalandhar, Punjab

Aug 2022 – May 2026

- **Relevant Coursework:** Artificial Intelligence, Machine Learning, NLP, Deep Learning, Data Structures, Algorithms, DBMS, Distributed Systems

EXPERIENCE

AI Intern

June 2026 – Present

Know AI

Ahmedabad, Gujarat

- Develop AI/ML and Generative AI applications using Python, LLMs, RAG pipelines, and modern AI frameworks.
- Build backend APIs using FastAPI to integrate AI capabilities with applications and automated workflows.
- Develop LLM-based solutions using prompt engineering, embeddings, vector retrieval, and context management.
- Implement testing, evaluation, experimentation, and performance optimization for reliable AI applications.
- Deploy and monitor AI services using Docker, Git, REST APIs, and production-oriented engineering workflows.

Data Engineer Intern

June 2025 – Aug 2025

flickDone

Remote (South Korea-based company)

- Built scalable Python and SQL data pipelines processing 50,000+ records for analytics and machine learning workflows.
- Developed ETL pipelines for data ingestion, preprocessing, validation, transformation, and automated processing.
- Built data workflows supporting machine learning applications and reliable datasets for analytical applications.
- Implemented automated validation and processing workflows to improve data quality, consistency, and reliability.
- Contributed to REST APIs and CI/CD workflows using GitHub, Docker, and Linux development environments.

PROJECTS

Regulatory Compliance RAG Assistant | Python, ChromaDB, BM25, Hugging Face

Apr 2026 – Jun 2026

- Built RAG system using Python, ChromaDB, BM25, Hugging Face, and Streamlit for regulatory document intelligence.
- Implemented hybrid retrieval combining vector search and BM25 with Reciprocal Rank Fusion for relevant retrieval.
- Integrated cross-encoder reranking and LLM workflows to generate context-aware responses with citations.
- Evaluated retrieval using Hit Rate and MRR across BM25, vector, hybrid, and reranked approaches.

AI Product Recommendation System | Python, FastAPI, FAISS, LLMs

Jun 2025 – Aug 2025

- Built an AI product recommendation system using Python, FastAPI, FAISS, embeddings, and LLMs.
- Implemented semantic search over SHL product metadata using BGE embeddings and FAISS retrieval.
- Integrated Claude 3 Haiku via OpenRouter to rerank retrieved products and improve relevance.
- Developed Streamlit UI and REST APIs for natural-language queries and top-3 recommendations.

Morning Market Brief | Python, FastAPI, LangChain, Docker

Jun 2024 – Aug 2024

- Built a finance assistant using Python, FastAPI, Streamlit, yfinance, and Hugging Face for market updates.
- Designed multi-agent workflows for market data retrieval, scraping, financial analysis, and response generation.
- Implemented FAISS and LangChain retrieval for financial insights with voice input and output capabilities.
- Containerized the application using Docker for reproducible development and deployment workflows.

TECHNICAL SKILLS

Languages: Python, SQL, Java, C++

GenAI: LLMs, Generative AI, RAG, Agentic AI, Agent Orchestration, Embeddings, Vector Search, Prompt Engineering

AI/ML: Machine Learning, Deep Learning, NLP, Model Evaluation, Retrieval Systems, AI Workflows

Frameworks: LangChain, LangGraph, PyTorch, Scikit-learn, Hugging Face, FastAPI

Data & APIs: ChromaDB, Vector Databases, PostgreSQL, MySQL, Pandas, NumPy, REST APIs

Cloud & DevOps: AWS, Docker, Git, GitHub Actions, Linux, CI/CD, Deployment, Monitoring

Engineering: Backend Development, API Integration, Testing, AI Pipelines, Production Systems, Cloud-Native Delivery
