EDUCATION

Lovely Professional University
Bachelor of Technology (Computer Science & Engineering)

Jalandhar, India
July 2022 - May 2026

SKILLS SUMMARY

- **Programming:** Python, C++, SQL
- **AI/ML:** Machine Learning, Deep Learning, PyTorch, Hugging Face, Model Evaluation, Performance Optimization
- **AI Domains:** Generative AI, LLMs, RAG, NLP, Prompt Engineering
- **MLOps:** ML Pipelines, Model Deployment, CI/CD
- **Backend:** FastAPI, REST APIs, Vector Databases, Python Backend Development
- **Tools:** Git, Docker, AWS, Cloud Infrastructure
- **Methodologies:** Data Processing, Experimentation, Debugging, Testing, Model Evaluation, Reproducible Workflows

WORK EXPERIENCE

- AI INTERN | Know AI | [LINK](#)

June 26- Present

 - Developed AI/ML applications using Python, LLMs, PyTorch, and modern AI frameworks.
 - Built backend services, REST APIs, and automation workflows supporting scalable AI-driven solutions and model deployment.
 - Designed and implemented RAG pipelines, prompt engineering workflows, and NLP solutions for Generative AI applications.
 - Collaborated cross-functionally to prototype, test, and deploy AI features integrating vector databases and cloud infrastructure.
 - Participated in experimentation, code reviews, debugging, model evaluation, and performance optimization.
- DATA ENGINEER INTERN | flickDONE | [LINK](#)

June 25- August 25

 - Built scalable machine learning pipelines for parallel NLP text classification across 50,000+ datasets.
 - Engineered Python tokenization and preprocessing workflows, reducing manual verification by 70%.
 - Optimized AWS data and ML pipelines, increasing execution speed by 25%.
 - Applied Generative AI and machine learning techniques to improve scalable intelligent data processing workflows.
 - Collaborated cross-functionally to deploy NLP, conversational AI, and automated agent workflows.

PROJECTS

- Regulatory Compliance RAG Assistant | [LINK](#)

April 26- June 2026

 - Developed Hugging Face ML workflows, improving zero-shot fraud detection accuracy by 30% through model evaluation.
 - Built asynchronous ChromaDB layers, improving real-time NLP, LLM search, and retrieval routing efficiency by 50%.
 - Implemented Python ML and RAG pipelines, reducing application latency by 50% through performance optimization.
 - Created validation dashboards, reducing automated text analysis processing times by 40%.
- AI Search & Recommendation Platform | [LINK](#)

June 25- August 2025

 - Designed Python frameworks for LLM-powered search, recommendation, semantic retrieval, and intelligent data processing.
 - Implemented Databricks data infrastructure, decreasing conversational AI routing latency by 35%.
 - Engineered resilient REST streaming APIs using FastAPI for AI workflows and automated system orchestration.
 - Deployed Docker architectures, improving AI pipeline reliability and scalability by 25%.
- Morning Market Brief | [LINK](#)

June 24- August 2024

 - Built automated Python workflows, reducing AI vector embedding data ingestion latency by 45%.
 - Applied structured validation modules, improving LLM prompt tracking, workflow transparency, and application reliability.
 - Automated OpenAI API integrations, streamlining complex Generative AI and LLM application workflows.
 - Containerized components using Docker, supporting reproducible model deployment and scalable AI automation architectures.

CERTIFICATES

- Python, Data Science & ML (Cipherschools) | [CERTIFICATE](#)

August 2024

 - Developed automated ML architectures, optimizing text classification metrics by 25% using PyTorch.
 - Designed Docker testing environments, improving deep learning model isolation and deployment pipelines.
- Generative AI with LLMs (Coursera) | [CERTIFICATE](#)

March 2024

 - Applied advanced few-shot prompt engineering to LLMs, streamlining conversational AI and Generative AI workflows.
 - Implemented database and retrieval workflows, improving visibility into RAG application performance.
