SUMMARY

AI Engineer with hands-on experience building and deploying generative AI, machine learning, and multimodal applications using Python, PyTorch, Hugging Face, LLMs, RAG, FastAPI, and computer vision. Experienced in AI model development, training and inference workflows, data preprocessing, model evaluation, API integration, Docker, CI/CD, monitoring, and production deployment. Strong foundation in deep learning, NLP, computer vision, AI pipelines, and scalable AI engineering.

EDUCATION

Lovely Professional University

B.Tech in Computer Science and Engineering

Jalandhar, Punjab

Aug 2022 – May 2026

- **Relevant Coursework:** Data Structures, Algorithms, Operating Systems, DBMS, Artificial Intelligence, Machine Learning, NLP, Distributed Systems

EXPERIENCE

AI Intern

Know AI

June 2026 – Present

Ahmedabad, Gujarat

- Built generative AI applications using Python, PyTorch, Hugging Face, LLMs, RAG, FastAPI, and agentic AI workflows.
- Developed AI services and REST APIs supporting model integration, document processing, retrieval, inference, and production deployment.
- Designed AI pipelines integrating LLMs, embeddings, vector databases, external APIs, structured workflows, and reusable components.
- Implemented model and LLM evaluation, testing, monitoring, debugging, and optimization to improve reliability and response quality.

Data Engineer Intern

flickDone

June 2025 – Aug 2025

Remote (South Korea-based company)

- Built data pipelines processing 50,000+ records using Python, Pandas, NumPy, SQL, and structured data workflows.
- Developed data ingestion, preprocessing, transformation, validation, and ETL pipelines supporting machine learning applications.
- Optimized PostgreSQL and MySQL queries improving backend performance, data accessibility, and processing efficiency.
- Created automated validation workflows and REST APIs using Docker, GitHub Actions, Linux, and software engineering practices.

PROJECTS

Regulatory Compliance RAG Assistant | *Python, LangChain, Hugging Face, ChromaDB* Apr 2026 – Jun 2026

- Built a generative AI RAG application using Python, LangChain, Hugging Face, embeddings, and ChromaDB for semantic retrieval.
- Implemented document preprocessing, chunking, indexing, retrieval pipelines, LLM inference, and prompt-based response generation.
- Developed evaluation and validation workflows to measure retrieval quality and improve LLM response reliability.

Smart Traffic AI Surveillance System | *Python, YOLO, OpenCV, FastAPI, AWS*

Jun 2025 – Aug 2025

- Built a computer vision system using Python, YOLO, OpenCV, and deep learning for real-time object detection and inference.
- Developed image preprocessing and model inference pipelines supporting practical computer vision applications.
- Integrated FastAPI, REST APIs, Docker, and AWS for scalable AI service deployment and backend integration.

Morning Market Brief | *Python, OpenAI API, Docker, Multi-Agent AI*

Jun 2024 – Aug 2024

- Built a multi-agent generative AI assistant using Python and LLMs for automated reasoning, tool usage, and multi-step task execution.
- Integrated OpenAI APIs, prompts, tools, and structured workflows for production-oriented GenAI applications.
- Implemented logging, testing, monitoring, evaluation, and Docker deployment for reliable AI service operation.

TECHNICAL SKILLS

Languages: Python, SQL, Java, C/C++

AI/ML: Machine Learning, Deep Learning, Generative AI, LLMs, Transformers, NLP, Computer Vision, RAG, Model Evaluation

ML Frameworks: PyTorch, scikit-learn, Hugging Face Transformers, YOLO, OpenCV

GenAI: LangChain, LangGraph, LLM Applications, Embeddings, Vector Databases, ChromaDB, Multi-Agent Systems

Data & APIs: Pandas, NumPy, PostgreSQL, MySQL, REST APIs, FastAPI, Data Pipelines, ETL, Document Processing

Engineering: AWS, Docker, Git, GitHub Actions, Linux, CI/CD, Testing, Debugging, Monitoring, Model Deployment
