SUMMARY

Generative AI Engineer with hands-on experience building LLM applications, agentic AI workflows, RAG systems, and AI backend services using Python, OpenAI APIs, LangChain, LangGraph, FastAPI, vector databases, and REST APIs. Experienced in prompt engineering, embeddings, tool integration, evaluation, testing, monitoring, and Docker deployment. Strong foundation in machine learning, NLP, data pipelines, and production-oriented AI engineering.

EDUCATION

Lovely Professional University

B.Tech in Computer Science and Engineering

Jalandhar, Punjab

Aug 2022 – May 2026

- **Relevant Coursework:** Data Structures, Algorithms, DBMS, Artificial Intelligence, Machine Learning, NLP, Distributed Systems

EXPERIENCE

AI Intern

Know AI

June 2026 – Present

Ahmedabad, Gujarat

- Built generative AI applications using Python, LLM APIs, FastAPI, RAG, embeddings, vector databases, and agentic AI workflows.
- Developed REST APIs integrating LLMs, retrieval systems, document processing, external APIs, and structured outputs.
- Designed reusable LLM workflows using prompts, tools, retrieval, state, and structured orchestration for multi-step applications.
- Implemented evaluation, testing, monitoring, debugging, and optimization workflows to improve AI reliability and response quality.

Data Engineer Intern

flickDone

June 2025 – Aug 2025

Remote

- Built data pipelines processing 50,000+ records using Python, Pandas, NumPy, SQL, and automated data workflows.
- Developed ingestion, preprocessing, transformation, validation, and ETL pipelines supporting machine learning applications.
- Built automated validation workflows and REST APIs using Docker, GitHub Actions, Git, Linux, and software engineering practices.

PROJECTS

Morning Market Brief | *Python, OpenAI API, LangGraph, Docker*

Jun 2024 – Aug 2024

- Built a multi-agent AI assistant using Python and LLMs for automated reasoning, tool usage, routing, and multi-step task execution.
- Integrated OpenAI APIs, prompts, tools, structured workflows, and external data sources for agentic AI applications.
- Implemented logging, testing, monitoring, evaluation, and Docker deployment practices for reliable and reproducible AI services.

Regulatory Compliance RAG Assistant | *Python, LangChain, Hugging Face, ChromaDB*

Apr 2026 – Jun 2026

- Built a RAG application using Python, LangChain, embeddings, and ChromaDB for semantic document retrieval and LLM generation.
- Implemented document ingestion, chunking, indexing, retrieval, and evaluation workflows to improve grounded LLM responses.
- Designed reusable retrieval pipelines connecting documents, vector search, prompts, and LLM inference.

Smart Traffic AI Surveillance System | *Python, YOLO, OpenCV, FastAPI, AWS*

Jun 2025 – Aug 2025

- Built a computer vision application using Python, YOLO, and OpenCV for real-time object detection and ML inference.
- Developed image preprocessing and inference pipelines supporting real-world computer vision applications and model deployment.
- Integrated FastAPI, REST APIs, Docker, and AWS for scalable AI service deployment and backend integration.

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL, Java, C/C++

Generative AI: LLMs, Agentic AI, RAG, Prompt Engineering, OpenAI API, Embeddings, Tool Calling, Multi-Agent Systems

Frameworks: LangChain, LangGraph, FastAPI, PyTorch, Hugging Face Transformers, scikit-learn

Data: ChromaDB, Vector Databases, Pandas, NumPy, PostgreSQL, MySQL, ETL

Engineering: REST APIs, Docker, Git, GitHub Actions, CI/CD, Linux, Testing, Debugging, Monitoring, Model Evaluation, AWS
