SUMMARY

AI Engineer with hands-on experience building machine learning, computer vision, and generative AI applications using Python, PyTorch, scikit-learn, LLMs, RAG, and FastAPI. Experienced in data preparation, model inference, evaluation, testing, monitoring, and deployment of AI systems. Strong foundation in machine learning, NLP, computer vision, SQL, data pipelines, and AI engineering, with practical internship and project experience developing scalable solutions from data processing through production deployment.

EDUCATION

Lovely Professional University

B.Tech in Computer Science and Engineering

Jalandhar, Punjab

Aug 2022 – May 2026

- **Relevant Coursework:** Data Structures, Algorithms, Operating Systems, DBMS, Computer Networks, Artificial Intelligence, Machine Learning, NLP, Distributed Systems, Computer Architecture

EXPERIENCE

AI Intern

Know AI

June 2026 – Present

Ahmedabad, Gujarat

- Built production AI applications using Python, FastAPI, PyTorch, and Large Language Models for practical AI workflows.
- Developed scalable AI services, REST APIs, microservices, and automation pipelines supporting model deployment and integration.
- Designed AI workflows integrating LLM APIs, databases, embeddings, vector databases, and external services for intelligent applications.
- Implemented prompt engineering, model evaluation, testing, monitoring, debugging, and optimization to improve AI system reliability.
- Built modular AI services integrating structured workflows, APIs, databases, and model inference components for maintainable deployment.

Data Engineer Intern

flickDone

June 2025 – Aug 2025

Remote (South Korea-based company)

- Built scalable data pipelines processing 50,000+ records using Python, Pandas, NumPy, and SQL.
- Developed data ingestion, preprocessing, transformation, and ETL workflows supporting reliable machine learning applications.
- Optimized PostgreSQL and MySQL queries to improve backend performance and structured data accessibility.
- Created automated data validation, testing, monitoring, and quality workflows improving system reliability.
- Developed REST APIs and deployed backend services using Docker, Git, GitHub Actions, and Linux.

PROJECTS

Regulatory Compliance RAG Assistant | *Python, LangChain, Hugging Face, ChromaDB* Apr 2026 – Jun 2026

- Built a RAG application using Python, LangChain, embeddings, and ChromaDB for semantic knowledge retrieval from documents.
- Implemented document processing, indexing, retrieval pipelines, and FastAPI services for reliable LLM-based workflows.
- Developed evaluation and testing workflows measuring retrieval accuracy, response quality, and system reliability.
- Applied prompt engineering and structured validation techniques to improve LLM response consistency and accuracy.

Smart Traffic AI Surveillance System | *Python, YOLO, OpenCV, FastAPI, AWS*

Jun 2025 – Aug 2025

- Built a computer vision system using Python, YOLO, and OpenCV for real-time object detection and automated inference.

- Developed image preprocessing and model inference pipelines supporting practical machine learning and computer vision applications.
- Integrated FastAPI services with REST APIs for reliable model deployment and application integration.
- Containerized AI services using Docker and AWS for scalable cloud-based deployment and testing.

Morning Market Brief | *Python, OpenAI API, Docker, Multi-Agent AI*

Jun 2024 – Aug 2024

- Built a multi-agent AI assistant using Python and LLMs for automated reasoning, information processing, and task execution.
- Integrated OpenAI APIs with prompts, tools, and structured workflows for generative AI applications.
- Implemented logging, testing, monitoring, and evaluation workflows for reliable AI system behavior.
- Developed Docker deployments for reproducible AI backend services and practical application testing.

TECHNICAL SKILLS

Languages: Python, SQL, Java, C/C++

AI/ML: Machine Learning, Deep Learning, Generative AI, Large Language Models, NLP, Computer Vision, RAG, Semantic Search, Model Evaluation, Prompt Engineering

ML Frameworks: PyTorch, scikit-learn, Hugging Face Transformers, YOLO, OpenCV

GenAI: LangChain, LangGraph, LLM Applications, Embeddings, Vector Databases, ChromaDB, Multi-Agent Systems

Data APIs: Pandas, NumPy, PostgreSQL, MySQL, SQL, REST APIs, Data Pipelines, ETL, Document Processing

Engineering: FastAPI, AWS, Docker, Git, GitHub Actions, Linux, Software Testing, Debugging, Monitoring, Observability
