SUMMARY

Generative AI Engineer with hands-on experience building and deploying LLM and GenAI applications using Python, LLM APIs, RAG, LangChain, LangGraph, FastAPI, vector databases, and cloud-based AI services. Experienced in developing AI APIs, retrieval pipelines, prompt engineering, document processing, evaluation, testing, and Docker-based deployment. Strong foundation in NLP, machine learning, data pipelines, BigQuery, AWS, and production-oriented AI engineering, with a focus on scalable and reliable GenAI solutions.

EDUCATION

Lovely Professional University

B.Tech in Computer Science and Engineering

Jalandhar, Punjab

Aug 2022 – May 2026

- **Relevant Coursework:** Data Structures, Algorithms, DBMS, Artificial Intelligence, Machine Learning, NLP, Distributed Systems

EXPERIENCE

AI Intern

Know AI

June 2026 – Present

Ahmedabad, Gujarat

- Developed Generative AI applications using Python, LLM APIs, RAG, embeddings, vector databases, and agentic AI workflows.
- Built REST APIs and backend services integrating LLMs, retrieval systems, document processing, external APIs, and structured outputs.
- Designed reusable GenAI workflows using prompt engineering, tool integration, retrieval, state management, and multi-step orchestration.
- Implemented evaluation, testing, monitoring, debugging, and optimization workflows to improve AI application reliability and response quality.

Data Engineer Intern

flickDone

June 2025 – Aug 2025

Remote

- Built Python and SQL data pipelines processing 50,000+ records using Pandas, NumPy, ETL workflows, and automated data processing.
- Developed ingestion, preprocessing, transformation, validation, and data quality pipelines supporting machine learning applications.
- Worked with cloud-based data workflows and databases while developing automated validation and processing systems.
- Built REST APIs and automated deployment workflows using Docker, GitHub Actions, Git, Linux, and CI/CD practices.

PROJECTS

Morning Market Brief | *Python, OpenAI API, LangGraph, Docker*

Jun 2024 – Aug 2024

- Built a multi-agent Generative AI application using Python and LLMs for automated reasoning, routing, tool usage, and multi-step task execution.
- Integrated LLM APIs, prompt engineering, structured outputs, external data sources, and reusable AI workflows.
- Implemented logging, evaluation, testing, and Docker deployment practices for reliable and reproducible AI services.

Regulatory Compliance RAG Assistant | *Python, LangChain, Hugging Face, ChromaDB* Apr 2026 – Jun 2026

- Built a Retrieval-Augmented Generation application using Python, LangChain, Hugging Face embeddings, ChromaDB, and LLM inference.
- Implemented document ingestion, preprocessing, chunking, embedding generation, vector indexing, retrieval, and grounded response generation.
- Designed reusable RAG pipelines connecting document data, vector search, prompts, and LLM APIs for enterprise-style AI applications.

- Built a computer vision AI application using Python, YOLO, and OpenCV for real-time object detection and ML inference.
- Developed preprocessing and inference pipelines for real-world AI workloads and model deployment.
- Integrated FastAPI and REST APIs with Docker and AWS for scalable AI service deployment and backend integration.

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript, Java, C/C++

Generative AI: Generative AI, LLMs, RAG, Prompt Engineering, Context Engineering, OpenAI API, Embeddings, Tool Calling, Agentic AI, Multi-Agent Systems

AI/ML: PyTorch, Hugging Face Transformers, scikit-learn, NLP, Machine Learning, Computer Vision

Frameworks: LangChain, LangGraph, FastAPI, Streamlit

Data & Databases: BigQuery, ChromaDB, Vector Databases, PostgreSQL, MySQL, Pandas, NumPy, ETL

Cloud & Engineering: GCP, AWS, Docker, Git, GitHub Actions, CI/CD, REST APIs, Linux, Testing, Debugging, Monitoring, Model Evaluation
