SUMMARY

AI/ML Engineer with hands-on experience building machine learning, Generative AI, LLM, RAG, and backend applications using Python, LangChain, FastAPI, and OpenAI APIs. Experienced in data processing, model development, AI evaluation, API integration, vector databases, and production-oriented AI workflows.

EDUCATION

Lovely Professional University

B.Tech in Computer Science and Engineering

Jalandhar, Punjab

Aug 2022 – May 2026

- **Relevant Coursework:** Data Structures, Algorithms, DBMS, AI, ML, NLP, Statistics, Distributed Systems

EXPERIENCE

AI Intern

Know AI

June 2026 – Present

Ahmedabad, Gujarat

- Built Generative AI, LLM, and RAG applications using Python, LangChain, FastAPI, and OpenAI APIs.
- Developed AI workflows involving prompt engineering, retrieval, tool calling, structured outputs, and API integrations.
- Implemented evaluation, logging, monitoring, and debugging workflows to improve AI application reliability.
- Integrated LLM applications with REST APIs, vector databases, and structured data sources.

Data Engineer Intern

flickDone

June 2025 – Aug 2025

Remote

- Built Python and SQL data pipelines processing 50,000+ records for machine learning applications.
- Developed data ingestion, preprocessing, transformation, validation, and automated workflows using Pandas and NumPy.
- Optimized PostgreSQL and MySQL queries supporting reliable data processing and downstream analysis.
- Implemented GitHub Actions and Docker-based CI/CD workflows for reliable application development and deployment.

PROJECTS

Morning Market Brief | Python, OpenAI API, LangGraph, LangChain, Docker

Jun 2024 – Aug 2024

- Built a multi-agent AI assistant using LangGraph for reasoning, routing, tool calling, and task execution.
- Integrated OpenAI APIs, prompts, external tools, structured outputs, and reusable agent workflows.
- Implemented evaluation, testing, logging, and monitoring workflows to identify failures and improve reliability.
- Containerized the application using Docker for reproducible development and deployment.

Regulatory Compliance RAG Assistant | Python, LangChain, Hugging Face, ChromaDB

Apr 2026 – Jun 2026

- Built a RAG application using LangChain for document retrieval and LLM-based question answering.
- Implemented document ingestion, chunking, embeddings, vector search, retrieval, and context-aware prompting workflows.
- Added evaluation workflows to assess retrieval quality and grounded responses across processed documents.
- Connected retrieval, prompting, and LLM inference into a reusable AI application workflow.

Smart Traffic AI Surveillance System | Python, YOLO, OpenCV, FastAPI, AWS

Jun 2025 – Aug 2025

- Built machine learning pipelines using Python, YOLO, and OpenCV for real-time object detection.
- Developed preprocessing, inference, model evaluation, and REST API workflows for AI applications.
- Integrated FastAPI and Docker to build deployable backend services for machine learning applications.
- Used AWS for cloud deployment and backend integration supporting AI application workflows.

TECHNICAL SKILLS

Languages: Python, SQL, Java, JavaScript, C/C++

AI/ML: Machine Learning, Deep Learning, Generative AI, LLMs, RAG, NLP, Embeddings, Model Evaluation

Frameworks: LangChain, LangGraph, FastAPI, PyTorch, Hugging Face, scikit-learn, OpenCV

AI Engineering: Prompt Engineering, Agentic AI, Tool Calling, AI Evaluation, Retrieval, Vector Search

Backend/Cloud: REST APIs, Docker, Git, GitHub Actions, CI/CD, Linux, AWS

Data/Databases: Pandas, NumPy, PostgreSQL, MySQL, SQL, ChromaDB, Vector Databases
