EDUCATION

Lovely Professional University
Bachelor of Technology (Computer Science & Engineering)

Jalandhar, India
July 2022 - May 2026

SKILLS SUMMARY

- **Programming:** Python
- **Machine Learning:** PyTorch, TensorFlow, Model Evaluation, Transformers
- **Generative AI:** LLMs, Prompt Engineering, Embeddings, Tokenisation, Attention
- **LLM Frameworks:** LangChain, LangGraph
- **RAG & Retrieval:** Vector Databases, FAISS, Qdrant, Semantic Search, Reranking, Retrieval Evaluation
- **ML Systems:** AWS, Docker, Git, Model Inference, Evaluation Frameworks, Monitoring, Deployment

WORK EXPERIENCE

- AI Intern | Know AI | [LINK](#)

June 2026 - August 2026

 - Built Generative AI and LLM applications using Python and PyTorch focused on model inference and evaluation.
 - Developed Python AI services and REST APIs integrating LLMs, tool/function calling, RAG, and automation.
 - Designed **RAG pipelines** using embeddings, vector databases, and semantic search for knowledge-grounded retrieval.
 - Developed AI/ML evaluation pipelines for model testing, error analysis, output validation, and reliability analysis.
 - Improved AI system reliability via evaluation, monitoring, debugging, latency optimization, and performance tuning.
- Data Engineer Intern | flickDONE | [LINK](#)

June 2025 - August 2025

 - Built scalable Python AI/ML data pipelines processing 50,000+ records for preprocessing and feature engineering.
 - Engineered automated **data preprocessing and validation workflows**, reducing manual verification by 70%.
 - Optimized AWS-based AI/ML pipelines, improving execution speed by 25% through performance tuning.
 - Developed reusable AI workflows for **document processing, LLM applications, and enterprise automation**.
 - Collaborated with engineering teams to improve **scalability, reliability, maintainability, and deployment** of ML platforms.

PROJECTS

- Ledgerly — Multi-Tenant SaaS Billing Platform | [LIVE](#)

April 2026 - September 2026

 - Built a **multi-tenant SaaS billing platform** using Next.js, NestJS, PostgreSQL, Prisma, and JWT authentication.
 - Implemented **tenant-isolated customer and invoice workflows**, dashboard balances, and OWNER/STAFF RBAC.
 - Built **Stripe payment workflows and webhook processing** with idempotency, transactional updates, and notifications.
 - Added **rate limiting, health checks, secure error handling, and responsive UI** for production-oriented reliability.
 - Developed 174 automated tests across 21 suites, covering authentication, billing, payments, notifications, and tenant isolation.
- LangGraph Workflow Orchestrator | [LIVE](#)

August 2025

 - Built and deployed a stateful **Agentic AI platform** using Python, LangGraph, LangChain, FastAPI, and Gemini.
 - Designed multi-step LLM conversation workflows with state management, conditional routing, and error recovery.
 - Developed modular components for **task decomposition, tool calling, function calling, and agent coordination**.
 - Exposed AI workflows through FastAPI REST APIs, enabling scalable model-backed service deployment.
 - Improved workflow reliability through **checkpointing, testing, failure handling, and monitoring**.
- Production-Grade RAG Engine | [LIVE](#)

June 2024 - August 2024

 - Built an end-to-end production-grade RAG system using Python, FastAPI, LangChain, Qdrant, and AWS.
 - Developed document preprocessing, chunking, embeddings, indexing, retrieval, and response generation pipelines.
 - Implemented **semantic vector search with Qdrant** for low-latency, knowledge-grounded context retrieval.
 - Added reranking and retrieval evaluation to improve retrieval quality, context relevance, and AI response performance.
 - Improved AI service reliability through testing, monitoring, fallback handling, and error analysis.

CERTIFICATES

- Python, Data Science & ML (Cipherschools) | [CERTIFICATE](#)

August 2024

 - Built machine learning models using PyTorch and applied ML techniques for model development and evaluation.
 - Developed **Dockerized environments** supporting reproducible experimentation and deployment
- Generative AI with Large Language Models (Coursera) | [CERTIFICATE](#)

March 2024

 - Applied prompt engineering techniques for production LLM applications.
 - Built **retrieval workflows, AI output evaluation, and RAG pipeline** performance validation.
