

EDUCATION

Lovely Professional University

Bachelor of Technology (Computer Science & Engineering)

Jalandhar, India

July 2022 - May 2026

SKILLS SUMMARY

- **Programming:** Python, C++, Data Structures, Algorithms, OOP
- **AI/ML:** Machine Learning, Deep Learning, PyTorch, Hugging Face, Model Evaluation, Probability & Statistics
- **AI Domains:** Generative AI, LLMs, RAG, NLP, Agentic AI
- **Backend:** FastAPI, REST APIs, Vector Databases
- **Tools:** Git, Docker, AWS, Cloud Infrastructure
- **Methodologies:** Model Evaluation, ML Pipelines, MLOps, Prompt Engineering

WORK EXPERIENCE

- AI INTERN | Know AI | [LINK](#)

June 26- Present

  - Developed and optimized AI/ML applications using Python, Large Language Models (LLMs), and modern AI frameworks.
  - Built backend services, REST APIs, and automation workflows to support scalable AI-driven solutions.
  - Designed and implemented RAG pipelines and prompt engineering workflows for Generative AI applications.
  - Collaborated cross-functionally to prototype, test, and deploy AI features, integrating vector databases and cloud infrastructure.
  - Participated in code reviews, debugging, model evaluation, and performance optimization.
- DATA ENGINEER INTERN | flickDONE | [LINK](#)

June 25- August 25

  - Built scalable machine learning pipelines for parallel NLP text classification across fifty thousand datasets.
  - Engineered Python tokenization routines for automated workflows, reducing manual verification by seventy percent.
  - Optimized cloud data and machine learning pipeline architectures on AWS, increasing execution speeds by twenty-five percent.
  - Applied Generative AI and machine learning techniques to improve scalable intelligent data processing workflows.
  - Collaborated cross-functionally to deploy NLP, conversational AI, and automated agent workflows.

PROJECTS

- Regulatory Compliance RAG Assistant | [LINK](#)

April 26- June 2026

  - Developed Hugging Face machine learning workflows, boosting zero-shot fraud detection accuracy by 30%.
  - Built asynchronous ChromaDB layers, boosting real-time NLP and LLM search and routing efficiency by fifty percent.
  - Implemented Python ML pipelines, cutting RAG application latency by 50% through performance optimization.
  - Created validation dashboards, cutting automated text analysis processing times by 40%.
- AI Search & Recommendation Platform | [LINK](#)

June 25- August 2025

  - Designed Python frameworks supporting LLM-powered search, recommendation, and intelligent data processing workflows.
  - Implemented Databricks data infrastructure, decreasing conversational AI routing latency by thirty-five percent.
  - Engineered resilient REST streaming APIs using FastAPI for AI workflows and automated system orchestration.
  - Deployed Docker architectures, accelerating pipeline reliability and scalability by 25%.
- Morning Market Brief | [LINK](#)

June 24- August 2024

  - Built automated Python workflows, reducing AI vector embedding data ingestion latency by forty-five percent.
  - Applied structured validation modules, increasing LLM prompt tracking transparency and application reliability.
  - Automated OpenAI API integrations, eliminating manual workflows for complex Generative AI applications.
  - Containerized components using Docker, ensuring rapid model deployment and scalable AI automation architectures.

CERTIFICATES

- Python, Data Science & ML (Cipherschools) | [CERTIFICATE](#)

August 2024

  - Developed automated ML architectures, optimizing text classification metrics by 25% using PyTorch.
  - Designed Docker testing environments, improving deep learning model isolation and deployment pipelines.
- Generative AI with LLMs (Coursera) | [CERTIFICATE](#)

March 2024

  - Applied advanced few-shot prompt engineering to LLMs, streamlining conversational AI and Generative AI workflows.
  - Implemented database and retrieval workflows, improving tracking visibility for automated retrieval-augmented generation frameworks.
