EDUCATION

Lovely Professional University
Bachelor of Technology (Computer Science & Engineering)

Jalandhar, India
July 2022 - May 2026

SKILLS SUMMARY

- **Programming:** Python, Node.js, JavaScript, TypeScript, SQL
- **AI & Machine Learning:** Machine Learning, Deep Learning, PyTorch, Neural Networks, Transformers, NLP, RAG, Information Retrieval, Embeddings, Vector Databases, Semantic Search
- **Backend & Data:** FastAPI, RESTful APIs, PostgreSQL, Pandas, NumPy, SQL, JSON
- **AI Frameworks:** Agentic AI, AI Agents, LangChain, LangGraph, Tool Calling, Workflow Automation
- **Engineering & Cloud:** AWS, Docker, Git, GitHub, Testing, Debugging, Performance Optimization, Monitoring, Observability

WORK EXPERIENCE

AI Intern | Know AI | [LINK](#) June 2026 - August 2026

- Built Generative AI and LLM-powered applications using Python, focusing on prompt engineering, validation, and evaluation.
- Developed and tested AI workflows and REST APIs, integrating tool calling, automation, RAG, and external APIs.
- Designed information retrieval pipelines using embeddings, vector databases, and semantic search.
- Developed LLM and agent evaluation pipelines measuring accuracy, reliability, tool performance, and output quality.
- Improved AI workflow reliability through testing, monitoring, debugging, latency optimization, and failure handling.

Data Engineer Intern | flickDONE | [LINK](#) June 2025 - August 2025

- Built scalable Python AI/ML data pipelines processing 50,000+ records for preprocessing and feature engineering.
- Engineered automated data ingestion, preprocessing, and validation workflows, reducing manual verification by 70%.
- Optimized AWS-based AI/ML pipelines, improving execution speed by 25% through performance tuning.
- Developed reusable AI workflows, API integrations, and automation for document processing and LLM applications.
- Collaborated with teams to improve workflow scalability, reliability, and deployment.

PROJECTS

Ledgerly — Multi-Tenant SaaS Billing Platform | [LIVE](#) August 2026 - September 2026

- Built a full-stack SaaS platform using Next.js, NestJS, Node.js, PostgreSQL, Docker, REST APIs, and testing.
- Implemented tenant-isolated customer and invoice workflows with RBAC and transactional data operations.
- Built Stripe payment workflows and webhook processing with idempotency and transactional updates.
- Added rate limiting, health checks, and secure error handling for production-grade reliability.
- Developed 174 automated tests across 21 suites covering authentication, billing, payments, and tenant isolation.

LangGraph Workflow Orchestrator — Agentic AI Platform | [LIVE](#) June 2026 - August 2026

- Built and deployed a stateful Agentic AI platform using Python, LangGraph, LangChain, FastAPI, and Gemini.
- Designed multi-step agentic workflows with planning, task routing, tool execution, failure handling, recovery, and evaluation.
- Developed modular components for task decomposition, tool calling, function calling, and agent coordination.
- Exposed AI workflows through FastAPI REST APIs, enabling scalable deployment and integration with external services.
- Evaluated agent workflows using evaluation datasets, multi-turn scenarios, failure analysis, and performance benchmarking.

Production-Grade RAG Engine | [LIVE](#) June 2026 - August 2026

- Built an end-to-end production-grade RAG and NLP system using Python, FastAPI, LangChain, Qdrant, and AWS.
- Developed document ingestion, preprocessing, chunking strategies, embeddings, indexing, retrieval, and response generation.
- Implemented semantic information retrieval with Qdrant for low-latency, knowledge-grounded search.
- Added reranking and retrieval evaluation to improve retrieval quality, context relevance, and AI response performance.
- Improved AI service reliability through testing, monitoring, fallback handling, and error analysis.

CERTIFICATES

Python, Data Science & ML (Cipherschools) | [CERTIFICATE](#) August 2024

- Built machine learning models using PyTorch and applied ML techniques for model development and evaluation.
- Developed Dockerized environments supporting reproducible experimentation and deployment

Generative AI with Large Language Models (Coursera) | [CERTIFICATE](#) March 2024

- Applied prompt engineering techniques for LLM applications.
- Built retrieval workflows, AI output evaluation, and RAG pipeline performance validation.
