## EDUCATION

### Lovely Professional University

B.Tech in Computer Science and Engineering

Jalandhar, Punjab

Aug 2022 – May 2026

- **Relevant Coursework:** Data Structures, Algorithms, Operating Systems, DBMS, Computer Networks, Artificial Intelligence, Machine Learning, Distributed Systems, Statistical Analysis

## EXPERIENCE

### AI Intern

Know AI

June 2026 – Present

Ahmedabad, Gujarat

- Built scalable machine learning workflows using Python, feature engineering, and statistical evaluation pipelines.
- Developed backend microservices and REST APIs supporting AI applications, automation, and data processing solutions.
- Designed scalable data pipelines using structured processing, embeddings, and feature engineering techniques.
- Performed model evaluation through statistical validation, testing, error analysis, and optimization.
- Improved service reliability through debugging, testing, monitoring, performance analysis, and scalable deployments.

### Data Engineer Intern

flickDone

June 2025 – Aug 2025

Remote (South Korea-based company)

- Built scalable data pipelines processing 50,000+ records using Python (NumPy, Pandas) and SQL.
- Designed ETL pipelines for data ingestion, validation, transformation, and automated processing.
- Optimized PostgreSQL and MySQL queries improving database performance, indexing, and analytical retrieval.
- Built automated validation frameworks ensuring reliable datasets for analytics and machine learning.
- Developed REST APIs and contributed to Docker-based CI/CD workflows using GitHub and Linux.

## PROJECTS

### Regulatory Compliance RAG Assistant | Python, LangChain, Hugging Face

Apr 2026 – Jun 2026

- Built a retrieval system using Python, LangChain, Hugging Face, and ChromaDB.
- Implemented semantic search using vector embeddings and efficient information retrieval algorithms.
- Optimized data pipelines through evaluation, performance analysis, and response quality improvements.
- Developed monitoring workflows for model validation, testing, and performance evaluation.

### AI Recommendation System | Python, FastAPI, Docker, LangChain, Prisma

Jun 2025 – Aug 2025

- Built a recommendation system using Python, FastAPI, and LangChain with scalable backend workflows.
- Integrated data pipelines and Prisma for scalable backend processing and REST API applications.
- Developed REST APIs supporting recommendation workflows and backend integrations.
- Containerized applications using Docker for reliable deployment and scalable services.

### Morning Market Brief | Python, OpenAI API, Docker, Multi-Agent AI

Jun 2024 – Aug 2024

- Built a data-driven system for automated financial information processing and analysis workflows.
- Integrated OpenAI APIs for intelligent summarization, reasoning, and analytical insights.
- Implemented workflow monitoring with execution logging and performance tracking mechanisms.
- Containerized services using Docker for scalable deployments and automation.

## TECHNICAL SKILLS

**Languages:** Python, Java, C/C++, SQL (PostgreSQL), JavaScript

**Frameworks:** FastAPI, Flask, React, Node.js, Scikit-learn, LangChain

**Developer Tools:** Git, Docker, GitHub Actions, Linux, Azure OpenAI, Azure Blob Storage

**Libraries:** Hugging Face, Pandas, NumPy, PyTorch
