EDUCATION

Lovely Professional University

B.Tech in Computer Science and Engineering

Jalandhar, Punjab

Aug 2022 – May 2026

- **Relevant Coursework:** Artificial Intelligence, Machine Learning, NLP, Data Structures, Algorithms, DBMS, Operating Systems, Distributed Systems, Statistical Analysis

EXPERIENCE

AI Intern

Know AI

June 2026 – Present

Ahmedabad, Gujarat

- Develop Generative AI applications using Python, LLMs, AI frameworks, and model evaluation pipelines.
- Build AI-powered REST APIs and workflows integrating LLMs with applications, tools, and automation services.
- Design agentic and RAG workflows using embeddings, vector retrieval, and structured data processing.
- Implement prompt engineering, model evaluation, experimentation, and performance optimization workflows.
- Perform testing, debugging, monitoring, and deployment optimization for reliable AI applications.

Data Engineer Intern

flickDone

June 2025 – Aug 2025

Remote (South Korea-based company)

- Built scalable Python and SQL data pipelines processing 50,000+ records for analytics and AI workflows.
- Developed ETL pipelines for data ingestion, preprocessing, validation, transformation, and automation.
- Optimized PostgreSQL and MySQL queries, indexing, and data retrieval for application performance.
- Built automated data validation workflows supporting reliable datasets for machine learning development.
- Contributed to REST APIs and CI/CD workflows using GitHub, Docker, and Linux deployments.

PROJECTS

Regulatory Compliance RAG Assistant | Python, LangChain, Hugging Face, ChromaDB Apr 2026 – Jun 2026

- Built a Generative AI assistant using Python, LangChain, Hugging Face, and ChromaDB for document workflows.
- Implemented RAG pipelines with document processing, embeddings, semantic search, and vector retrieval.
- Designed prompt-driven workflows generating context-aware responses from retrieved regulatory information.
- Implemented evaluation and monitoring workflows to validate retrieval quality, responses, and AI outputs.

AI Product Recommendation System | Python, FastAPI, LangChain, Docker, Prisma Jun 2025 – Aug 2025

- Built a Generative AI recommendation application using Python, FastAPI, LangChain, and scalable data workflows.
- Developed REST APIs integrating AI workflows with backend services for recommendations and application integration.
- Implemented prompt-driven recommendation workflows and data pipelines for personalized AI outputs.
- Containerized AI services with Docker for reproducible deployment and scalable application environments.

Morning Market Brief | Python, OpenAI API, Docker, Multi-Agent AI Jun 2024 – Aug 2024

- Built a conversational AI assistant using Python and OpenAI APIs for financial information processing and summarization.
- Designed multi-agent workflows for information analysis, reasoning, summarization, and response generation.
- Implemented execution logging and workflow monitoring for debugging, evaluation, and performance tracking.
- Containerized AI services using Docker for reproducible deployment and automated application workflows.

TECHNICAL SKILLS

Languages: Python, Java, SQL

Machine Learning: Machine Learning, Deep Learning, NLP, Computer Vision, Model Training, Model Evaluation

Frameworks: PyTorch, Scikit-learn, Hugging Face, LangChain

Data: PostgreSQL, MySQL, pandas, NumPy, Feature Engineering, Data Pipelines

ML Engineering: Model Inference, Experimentation, Error Analysis, Performance Optimization

Generative AI: LLMs, RAG, Embeddings, Semantic Search

Tools: Git, Docker, Linux, GitHub Actions
