EDUCATION

Lovely Professional University
Bachelor of Technology (Computer Science & Engineering)

Jalandhar, India
July 2022 - May 2026

SKILLS SUMMARY

- **Programming:** Python, SQL, NumPy, Pandas
- **Machine Learning:** Machine Learning, Deep Learning, PyTorch, scikit-learn, Neural Networks, Model Evaluation, Feature Engineering, Model Inference
- **Generative AI:** LLMs, RAG, LangChain, LangGraph, Prompt Engineering, Embeddings, Vector Databases, Semantic Search, Agentic AI
- **Production:** AWS, Docker, Automated Testing, Scalable AI Systems
- **AI Engineering:** FastAPI, REST APIs, Retrieval Evaluation, Performance Optimization, Monitoring

WORK EXPERIENCE

- AI Intern | Know AI | [LINK](#)** June 2026 - August 2026
- Built AI and LLM applications using Python, NLP, model inference, experimentation, and model evaluation.
 - Developed **Python AI services and REST APIs** integrating LLMs, RAG, search, tool calling, and automation workflows.
 - Designed **RAG pipelines** using embeddings, vector databases, and semantic search for knowledge-grounded retrieval.
 - Developed AI/ML evaluation pipelines for model testing, error analysis, output validation, and reliability analysis.
 - Improved AI workflow reliability through evaluation, monitoring, debugging, performance tuning, and latency optimization.
- Data Engineer Intern | flickDONE | [LINK](#)** June 2025 - August 2025
- Built Python-based ML data pipelines processing 50,000+ records for preprocessing, feature engineering, and validation.
 - Engineered automated **data preprocessing and validation workflows**, reducing manual verification by 70%.
 - Optimized **AWS ML pipelines**, improving execution speed by 25% through bottleneck analysis and workflow optimization.
 - Developed reusable AI workflows for **document processing, LLM applications, and enterprise automation**.
 - Collaborated with engineering teams to improve **scalability, reliability, maintainability, and deployment** of ML platforms.

PROJECTS

- Ledgerly — Multi-Tenant SaaS Billing Platform | [LIVE](#)** April 2026 - September 2026
- Built a **multi-tenant SaaS billing platform** using Next.js, NestJS, PostgreSQL, Prisma, and JWT authentication.
 - Implemented **tenant-isolated customer and invoice workflows**, dashboard balances, and OWNER/STAFF RBAC.
 - Built **Stripe payment workflows and webhook processing** with idempotency, transactional updates, and notifications.
 - Added **rate limiting, health checks, secure error handling, and responsive UI** for production-oriented reliability.
 - Developed 174 automated tests across 21 suites, covering authentication, billing, payments, notifications, and tenant isolation.
- LangGraph Workflow Orchestrator | [LIVE](#)** August 2025
- Built and deployed a stateful **Agentic AI platform** using Python, LangGraph, LangChain, FastAPI, and Gemini.
 - Designed multi-step **LLM workflows** with state management, conditional routing, and error recovery.
 - Developed modular components for **task decomposition, tool calling, function calling, and agent coordination**.
 - Exposed AI workflows through **FastAPI REST APIs**, enabling scalable AI task automation.
 - Improved workflow reliability through **checkpointing, testing, failure handling, and monitoring**.
- Production-Grade RAG Engine | [LIVE](#)** June 2024 - August 2024
- Built an end-to-end **RAG application** using Python, FastAPI, LangChain, Qdrant, and AWS.
 - Developed **document ingestion, chunking, embeddings, retrieval, and response generation** pipelines.
 - Implemented **semantic search** with Qdrant for efficient context retrieval.
 - Added reranking and retrieval evaluation to improve retrieval quality, context relevance, and AI response performance.
 - Improved AI service **reliability and maintainability** through testing, monitoring, fallback execution, and error handling.

CERTIFICATES

- Python, Data Science & ML (Cipherschools) | [CERTIFICATE](#)** August 2024
- Built machine learning models using PyTorch and applied ML techniques for model development and evaluation.
 - Developed **Dockerized environments** supporting reproducible experimentation and deployment
- Generative AI with Large Language Models (Coursera) | [CERTIFICATE](#)** March 2024
- Applied prompt engineering techniques for production LLM applications.
 - Built **retrieval workflows, AI output evaluation, and RAG pipeline** performance validation.
