SUMMARY

AI Engineer experienced in building autonomous AI agents, LLM applications, data pipelines, and backend systems using Python, LangGraph, LangChain, and FastAPI. Strong foundation in algorithms, machine learning, data engineering, system design, distributed systems, RAG, agent orchestration, and end-to-end AI deployment using Docker, REST APIs, and CI/CD.

EDUCATION

Lovely Professional University

B.Tech in Computer Science and Engineering

Jalandhar, Punjab

Aug 2022 – May 2026

- **Relevant Coursework:** Artificial Intelligence, Machine Learning, Deep Learning, NLP, Data Structures, Algorithms, DBMS, Distributed Systems

EXPERIENCE

AI Intern

Know AI

June 2026 – Present

Ahmedabad, Gujarat

- Develop autonomous AI agents and multi-agent workflows using Python, LangGraph, LangChain, and LLMs.
- Build FastAPI backend services integrating agents with REST APIs, databases, tools, and workflows.
- Develop machine learning workflows supporting experimentation, evaluation, inference, optimization, and reliable model performance.
- Implement agent testing, monitoring, validation, evaluation, and optimization for reliable AI system performance.
- Deploy containerized AI services using Docker, Git, REST APIs, and production engineering workflows.

Data Engineer Intern

flickDone

June 2025 – Aug 2025

Remote (South Korea-based company)

- Built scalable Python and SQL data pipelines processing 50,000+ records for analytics and machine learning.
- Developed data transformation, preprocessing, validation, and automated processing pipelines supporting AI applications.
- Prepared structured datasets supporting machine learning workflows, analytics, model development, and data-driven applications.
- Implemented automated data validation and processing workflows improving quality, consistency, and pipeline reliability.
- Contributed to REST APIs and CI/CD workflows using GitHub, Docker, Linux, and automation.

PROJECTS

Enterprise AI Operations Copilot | *Python, FastAPI, LangGraph, PostgreSQL, Redis, Qdrant*

2026

- Designed an autonomous AI operations platform using Python, FastAPI, LangGraph, PostgreSQL, Redis, Qdrant.
- Developed multi-agent workflows for knowledge retrieval, task execution, engineering operations, and decision-support automation.
- Integrated databases, vector retrieval, APIs, tools, and external services into orchestrated agent workflows.
- Designed backend architecture, asynchronous workflows, observability, evaluation, and monitoring components for reliable systems.

Morning Market Brief | *Python, LangGraph, OpenAI API, Docker*

Jun 2024 – Aug 2024

- Built multi-agent financial applications using Python, LangGraph, OpenAI API, and external financial data.
- Implemented autonomous workflows for financial retrieval, analysis, reasoning, summarization, and response generation.
- Integrated APIs, retrieval components, prompts, and structured workflows for financial information processing and decisions.
- Containerized AI services using Docker for reproducible development, testing, and deployment workflows.

AI Product Recommendation System | *Python, FastAPI, FAISS, LLMs*

Jun 2025 – Aug 2025

- Built LLM-powered recommendation applications using Python, FastAPI, FAISS, embeddings, and REST APIs.
- Implemented data processing, embedding generation, semantic retrieval, candidate ranking, and recommendation workflows.
- Integrated Claude 3 Haiku through OpenRouter for LLM-based candidate reranking and recommendation generation.
- Developed evaluation workflows measuring retrieval relevance, ranking behavior, and recommendation quality across user queries.

TECHNICAL SKILLS

Languages: Python, C++, Java, SQL, Rust

AI/ML: Machine Learning, Deep Learning, Generative AI, LLMs, AI Agents, Model Evaluation, NLP

Agent Systems: Autonomous Agents, Multi-Agent Systems, Agent Orchestration, LangGraph, LangChain, Tool Integration, Function Calling, RAG

Backend & Systems: FastAPI, REST APIs, System Design, Distributed Systems, Asynchronous Workflows, Microservices

Data Engineering: Pandas, NumPy, PostgreSQL, Redis, Qdrant, FAISS, ETL, Data Transformation, Data Pipelines

Algorithms: Data Structures, Algorithms, Algorithmic Problem Solving, OOP, Complexity Analysis

Tools: Docker, Git, GitHub, GitHub Actions, Linux, CI/CD

Cloud: AWS, GCP, Azure
