## SUMMARY

AI Engineer with hands-on experience building agentic AI and generative AI applications using Python, FastAPI, LLMs, LangChain, LangGraph, RAG, REST APIs, and structured workflows. Experienced in developing tool-using agents, retrieval systems, API integrations, evaluation, testing, monitoring, debugging, and deployment. Strong foundation in multi-step agent execution, state management, structured outputs, human-in-the-loop workflows, and reliable AI engineering.

## EDUCATION

### Lovely Professional University

*B.Tech in Computer Science and Engineering*

Jalandhar, Punjab

Aug 2022 – May 2026

- **Relevant Coursework:** Data Structures, Algorithms, Operating Systems, DBMS, Artificial Intelligence, Machine Learning, NLP, Distributed Systems

## EXPERIENCE

### AI Intern

*Know AI*

June 2026 – Present

Ahmedabad, Gujarat

- Built agentic AI applications using Python, FastAPI, LLMs, LangChain, LangGraph, RAG, and multi-step workflows.
- Developed AI services integrating tools, REST APIs, external systems, retrieval, structured outputs, and workflow state.
- Designed agent workflows with prompts, embeddings, vector databases, tool execution, validation, and structured decision paths.
- Implemented evaluation, testing, monitoring, debugging, and optimization to improve agent reliability, response quality, and execution behavior.

### Data Engineer Intern

*flickDone*

June 2025 – Aug 2025

Remote (South Korea-based company)

- Built data pipelines processing 50,000+ records using Python, Pandas, NumPy, SQL, and structured data workflows.
- Developed data ingestion, preprocessing, transformation, validation, and ETL pipelines supporting machine learning applications.
- Optimized PostgreSQL and MySQL queries improving backend performance, data accessibility, and processing efficiency.
- Created automated validation workflows and REST APIs using Docker, GitHub Actions, Linux, and software engineering practices.

## PROJECTS

### Morning Market Brief | *Python, OpenAI API, Docker, Multi-Agent AI*

Jun 2024 – Aug 2024

- Built a multi-agent AI assistant using Python and LLMs for automated reasoning, tool usage, stateful workflows, and multi-step task execution.
- Integrated OpenAI APIs, prompts, tools, structured outputs, and workflow orchestration for agentic AI applications.
- Implemented logging, testing, monitoring, evaluation, and Docker deployments for reliable agent service operation.

### Regulatory Compliance RAG Assistant | *Python, LangChain, Hugging Face, ChromaDB* Apr 2026 – Jun 2026

- Built a RAG application using Python, LangChain, embeddings, and ChromaDB for document processing and semantic retrieval.
- Implemented document indexing, chunking, retrieval pipelines, LLM workflows, and context-aware response generation.
- Developed evaluation and validation workflows to measure retrieval quality and improve LLM response reliability.

- Built a computer vision system using Python, YOLO, and OpenCV for real-time object detection and ML inference.
- Developed image preprocessing and model inference pipelines supporting practical machine learning applications.
- Integrated FastAPI, REST APIs, Docker, and AWS for scalable model deployment and backend integration.

## TECHNICAL SKILLS

---

**Languages:** Python, SQL, Java, C/C++

**Agentic AI:** Agentic AI, Multi-Agent Systems, LangGraph, LangChain, Tool Calling, Workflow Orchestration, State Management

**GenAI:** LLMs, RAG, Generative AI, Embeddings, Vector Databases, Structured Outputs, Prompt Engineering, AI Evaluation

**AI Frameworks:** PyTorch, scikit-learn, Hugging Face Transformers, LangChain, LangGraph, ChromaDB

**Data & APIs:** Pandas, NumPy, PostgreSQL, MySQL, REST APIs, Data Pipelines, ETL, Document Processing

**Engineering:** FastAPI, AWS, Docker, Git, GitHub Actions, Linux, Testing, Debugging, Monitoring
