SUMMARY

AI Engineer with hands-on experience building production-oriented AI applications and backend services using Python, FastAPI, Java, PyTorch, LLMs, RAG, LangChain, and REST APIs. Experienced in AI evaluation, prompt engineering, embeddings, vector databases, document processing, model inference, testing, debugging, and deployment. Strong foundation in software engineering, generative AI, retrieval systems, data pipelines, and scalable AI application development.

EDUCATION

Lovely Professional University

B.Tech in Computer Science and Engineering

Jalandhar, Punjab

Aug 2022 – May 2026

- **Relevant Coursework:** Data Structures, Algorithms, Operating Systems, DBMS, Artificial Intelligence, Machine Learning, NLP, Distributed Systems

EXPERIENCE

AI Intern

Know AI

June 2026 – Present

Ahmedabad, Gujarat

- Built AI applications and backend services using Python, FastAPI, LLMs, RAG, LangChain, and agentic AI workflows.
- Developed REST APIs supporting LLM integration, document processing, retrieval, inference, evaluation, and deployment.
- Designed AI workflows using prompts, embeddings, vector databases, tools, external APIs, and structured memory-aware workflows.
- Implemented LLM evaluations, testing, debugging, monitoring, and optimization to improve application reliability and response quality.

Data Engineer Intern

flickDone

June 2025 – Aug 2025

Remote (South Korea-based company)

- Built data pipelines processing 50,000+ records using Python, Pandas, NumPy, SQL, and structured data workflows.
- Developed data ingestion, preprocessing, transformation, validation, and ETL pipelines supporting machine learning applications.
- Optimized PostgreSQL and MySQL queries improving backend performance, data accessibility, and processing efficiency.
- Created automated validation workflows and REST APIs using Docker, GitHub Actions, Linux, and software engineering practices.

PROJECTS

Regulatory Compliance RAG Assistant | *Python, LangChain, Hugging Face, ChromaDB* Apr 2026 – Jun 2026

- Built a RAG application using Python, LangChain, embeddings, and ChromaDB for document processing and semantic retrieval.
- Implemented document indexing, chunking, retrieval pipelines, LLM workflows, prompts, and context-aware response generation.
- Developed evaluation and validation workflows to measure retrieval quality and improve LLM response reliability.

Smart Traffic AI Surveillance System | *Python, YOLO, OpenCV, FastAPI, AWS* Jun 2025 – Aug 2025

- Built a computer vision system using Python, YOLO, and OpenCV for real-time object detection and ML inference.
- Developed image preprocessing and model inference pipelines supporting practical machine learning applications.
- Integrated FastAPI, REST APIs, Docker, and AWS for scalable model deployment and backend integration.

Morning Market Brief | *Python, OpenAI API, Docker, Multi-Agent AI*

Jun 2024 – Aug 2024

- Built a multi-agent AI assistant using Python and LLMs for automated reasoning, tool usage, memory, and multi-step task execution.
- Integrated OpenAI APIs, prompts, tools, and structured workflows for agentic GenAI applications.
- Implemented logging, testing, monitoring, evaluation, and Docker deployments for reliable AI service operation.

TECHNICAL SKILLS

Languages: Python, Java, SQL, C/C++

AI/ML: Machine Learning, Deep Learning, Generative AI, LLMs, NLP, RAG, Model Evaluation, Prompt Engineering

AI Frameworks: LangChain, LangGraph, PyTorch, scikit-learn, Hugging Face Transformers

GenAI: RAG, LLM Applications, Embeddings, Vector Databases, ChromaDB, Agentic AI, AI Memory, Evals

Data & APIs: Pandas, NumPy, PostgreSQL, MySQL, REST APIs, Data Pipelines, ETL, Document Processing

Engineering: FastAPI, AWS, Docker, Git, GitHub Actions, Linux, Testing, Debugging, Monitoring
