EDUCATION

Lovely Professional University

B.Tech in Computer Science and Engineering

Jalandhar, Punjab

Aug 2022 – May 2026

- **Relevant Coursework:** Data Structures, Algorithms, Operating Systems, DBMS, Computer Networks, Artificial Intelligence, Machine Learning, Distributed Systems, Computer Architecture

EXPERIENCE

AI Intern

Know AI

June 2026 – Present

Ahmedabad, Gujarat

- Built AI and LLM workflows using Python, agent orchestration, tool integrations, and model evaluation.
- Developed backend services and REST APIs supporting AI agents, data integrations, and reliable execution workflows.
- Designed data pipelines for ingestion, preprocessing, transformation, retrieval, and automated validation.
- Implemented evaluation workflows covering testing, monitoring, validation, regression detection, and performance analysis.
- Experimented with agentic architectures, retrieval techniques, datasets, and model configurations to improve system performance.

Data Engineer Intern

flickDone

June 2025 – Aug 2025

Remote (South Korea-based company)

- Built scalable data pipelines processing 50,000+ records using Python, Pandas, NumPy, and SQL.
- Developed ETL pipelines for data ingestion, preprocessing, transformation, validation, and automated quality checks.
- Optimized PostgreSQL and MySQL queries improving database performance and data access efficiency.
- Created automated testing and validation workflows improving data quality and pipeline reliability.
- Developed REST APIs and containerized deployments using Docker, GitHub Actions, and Linux.

PROJECTS

Regulatory Compliance RAG Assistant | Python, LangChain, Hugging Face

Apr 2026 – Jun 2026

- Built an agentic RAG application using Python, LangChain, Hugging Face, and ChromaDB.
- Implemented retrieval pipelines using embeddings, vector databases, and transformer language models.
- Developed evaluation workflows to assess AI response accuracy, reliability, regression risks, and performance.
- Experimented with evaluation strategies, retrieval configurations, and model settings to improve system performance.

Morning Market Brief | Python, OpenAI API, Docker, Multi-Agent AI

Jun 2024 – Aug 2024

- Built a multi-agent AI system for automated planning, reasoning, information processing, and workflow execution.
- Integrated OpenAI APIs and prompt engineering for multi-step agent workflows and automated task execution.
- Implemented execution tracking, structured logging, and monitoring for reliable AI workflow debugging.
- Developed containerized deployments using Docker for reproducible AI service execution and testing.

AI Recommendation System | Python, FastAPI, Docker, LangChain, Prisma

Jun 2025 – Aug 2025

- Built an AI-powered recommendation platform using Python, FastAPI, LLM workflows, and backend services.
- Designed APIs and data pipelines supporting AI workflows, structured processing, and application integrations.
- Integrated data processing and validation workflows to improve reliability of AI-driven recommendations.
- Containerized services using Docker for reliable execution and reproducible deployment environments.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, Java, C/C++, SQL **AI/ML:** Machine Learning, Large Language Models, AI Agents, Agentic Systems, RAG, Embeddings, Model Evaluation **Frameworks:** PyTorch, Hugging Face Transformers, FastAPI, Flask, LangChain, Scikit-learn **Backend Evaluation:** REST APIs, Async Processing, Automated Testing, Validation, Regression Testing, Monitoring, Structured Logging **Cloud Tools:** AWS, Docker, Git, GitHub Actions, Linux, CI/CD, Azure OpenAI **Libraries:** Pandas, NumPy, ChromaDB, Vector Databases
