EDUCATION

Lovely Professional University

B.Tech in Computer Science and Engineering

Jalandhar, Punjab

Aug 2022 – May 2026

- **Relevant Coursework:** Data Structures, Algorithms, Operating Systems, DBMS, Computer Networks, Artificial Intelligence, Machine Learning, NLP, Neural Networks, Data Mining, Statistical Analysis

EXPERIENCE

AI Intern

Know AI

June 2026 – Present

Ahmedabad, Gujarat

- Built Generative AI workflows using LLMs, NLP, prompt engineering, and model evaluation for AI applications.
- Developed backend services and REST APIs integrating LLM inference, AI search, and workflow automation.
- Designed Retrieval-Augmented Generation (RAG) pipelines using embeddings and vector databases for contextual retrieval.
- Built AI evaluation pipelines performing model testing, error analysis, output validation, and performance optimization.
- Improved AI model reliability through evaluation, prompt optimization, and scalable inference workflow development.

Data Engineer Intern

flickDone

June 2025 – Aug 2025

Remote (South Korea-based company)

- Built scalable ML data pipelines processing 50,000+ records using Python (NumPy, Pandas) and SQL for model training workflows
- Designed ETL pipelines for data ingestion, preprocessing, feature engineering and ML workflow automation
- Optimized PostgreSQL and MySQL queries improving database performance, indexing and low-latency retrieval for ML systems
- Built automated data validation frameworks ensuring high-quality datasets for machine learning model training
- Contributed to REST APIs and CI/CD backend workflows using GitHub and Linux for production ML deployments

PROJECTS

Regulatory Compliance RAG Assistant | Python, Hugging Face

Apr 2026 – Jun 2026

- Built a RAG assistant using Python, Hugging Face, and ChromaDB frameworks for compliance
- Implemented semantic search with vector embeddings and efficient document retrieval pipelines
- Optimized RAG pipelines for faster retrieval and improved inference performance consistently
- Developed monitoring dashboards for AI response validation and performance analysis metrics

Agentic AI Recommendation System | Python, FastAPI, Docker, Databricks, Prisma

Jun 2025 – Aug 2025

- Built an AI recommendation system using Python and FastAPI backend services efficiently
- Integrated Databricks and Prisma for scalable data processing workflows and analytics
- Developed REST APIs supporting recommendation workflows and backend integration seamlessly
- Containerized applications using Docker for reliable deployment and scalability across environments

Morning Market Brief | Python, OpenAI API, Docker, Multi-Agent AI

Jun 2024 – Aug 2024

- Built a multi-agent AI system for automated financial news generation workflows
- Integrated OpenAI APIs for intelligent content generation and summarization capabilities
- Implemented workflow monitoring with prompt tracking and execution logging mechanisms
- Containerized AI services using Docker for scalable production deployments and automation

TECHNICAL SKILLS

Languages: Python, Java, C/C++, SQL (Postgres), JavaScript

Frameworks: FastAPI, Flask, LangChain, LangGraph, React, Node.js

Developer Tools: Git, Docker, Google Cloud Platform, VS Code, Linux, PyCharm

Libraries: Hugging Face, pandas, NumPy, Matplotlib
