EDUCATION

Lovely Professional University

B.Tech in Computer Science and Engineering

Jalandhar, Punjab

Aug 2022 – May 2026

- **Relevant Coursework:** Data Structures, Algorithms, Operating Systems, DBMS, Computer Networks, Artificial Intelligence, Machine Learning, Distributed Systems, Computer Architecture

EXPERIENCE

AI Intern

June 2026 – Present

Know AI

Ahmedabad, Gujarat

- Built AI agent workflows using Python, LLMs, embeddings, and automation pipelines for intelligent applications.
- Developed backend services and REST APIs supporting AI agents, data integrations, and production workflows.
- Designed data pipelines for ingestion, transformation, retrieval systems, and AI-driven automation.
- Implemented model evaluation, validation, monitoring, testing, and performance optimization workflows for reliable AI deployments.
- Integrated AI services with scalable application components supporting reliable and efficient operational workflows.

Data Engineer Intern

June 2025 – Aug 2025

flickDone

Remote (South Korea-based company)

- Built scalable data pipelines processing 50,000+ records using Python, Pandas, NumPy, SQL, and automation workflows.
- Developed backend services and ETL pipelines for data ingestion, transformation, validation, and application systems.
- Optimized PostgreSQL and MySQL queries improving database performance and data access efficiency.
- Created automated workflows improving data quality and reliability for analytics and AI-powered applications.
- Developed REST APIs and containerized deployments using Docker, GitHub Actions, and Linux environments.

PROJECTS

Regulatory Compliance RAG Assistant | Python, LangChain, Hugging Face

Apr 2026 – Jun 2026

- Built an agentic RAG application using Python, LangChain, Hugging Face, and ChromaDB for knowledge automation.
- Implemented retrieval pipelines using embeddings, vector databases, and transformer-based language models.
- Developed evaluation workflows improving AI response accuracy, reliability, and application performance.
- Created monitoring workflows for testing and validating AI system behavior and production reliability.

AI Recommendation System | Python, FastAPI, Docker, LangChain, Prisma

Jun 2025 – Aug 2025

- Built an AI-powered recommendation platform using LLM workflows, FastAPI, and backend services.
- Designed APIs and data pipelines supporting AI-driven recommendations and application integrations.
- Integrated structured data processing with AI components for scalable product intelligence workflows.
- Containerized services using Docker for reliable deployment and cloud-ready application environments.

Morning Market Brief | Python, OpenAI API, Docker, Multi-Agent AI

Jun 2024 – Aug 2024

- Built a multi-agent AI system for automated reasoning, information processing, and workflow execution.
- Integrated OpenAI APIs for LLM-powered summarization, analysis, and intelligent automation.
- Implemented execution tracking, logging, and monitoring for reliable AI workflows.
- Developed containerized deployments for scalable AI services and automated operations.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, Java, C/C++, SQL

AI/ML: Machine Learning, Large Language Models, AI Agents, RAG, Embeddings, Prompt Engineering, Model Evaluation, Model Validation

Frameworks: FastAPI, Flask, React, Node.js, LangChain, Scikit-learn

Cloud & Tools: AWS, Docker, Git, GitHub Actions, Linux, Azure OpenAI, Azure Blob Storage

Libraries: PyTorch, Hugging Face Transformers, Pandas, NumPy, ChromaDB
