SUMMARY

Generative AI Engineer with hands-on experience building LLM applications, RAG pipelines, agentic AI workflows, computer vision systems, and AI backend services using Python, PyTorch, Hugging Face Transformers, OpenAI APIs, LangChain, LangGraph, FastAPI, and vector databases. Experienced in prompt engineering, embeddings, document processing, model evaluation, AI experimentation, REST APIs, Docker, CI/CD, and production-oriented AI development. Strong foundation in machine learning, NLP, deep learning, traditional ML, and rapid prototyping of AI/ML solutions.

EDUCATION

Lovely Professional University

B.Tech in Computer Science and Engineering

Jalandhar, Punjab

Aug 2022 – May 2026

- **Relevant Coursework:** Data Structures, Algorithms, DBMS, Artificial Intelligence, Machine Learning, Deep Learning, NLP, Distributed Systems

EXPERIENCE

AI Intern

Know AI

June 2026 – Present

Ahmedabad, Gujarat

- Developed Generative AI applications using Python, LLM APIs, RAG, embeddings, vector databases, LangChain, LangGraph, and FastAPI.
- Built AI/ML pipelines integrating document processing, retrieval, prompt engineering, external APIs, structured outputs, and LLM inference.
- Designed and evaluated agentic AI workflows for multi-step reasoning, tool calling, retrieval, automation, and enterprise AI use cases.
- Implemented testing, evaluation, debugging, monitoring, and optimization workflows to improve model reliability, response quality, and application performance.

Data Engineer Intern

flickDone

June 2025 – Aug 2025

Remote

- Built data preprocessing and ETL pipelines processing 50,000+ records using Python, Pandas, NumPy, SQL, and automated workflows.
- Developed ingestion, transformation, validation, and data quality pipelines supporting machine learning and analytics applications.
- Implemented automated validation workflows and API integrations using Docker, GitHub Actions, Git, Linux, and CI/CD practices.

PROJECTS

Morning Market Brief | *Python, OpenAI API, LangGraph, Docker*

Jun 2024 – Aug 2024

- Built a multi-agent Generative AI system using Python, OpenAI APIs, and LangGraph for reasoning, routing, tool calling, and multi-step task execution.
- Designed agent workflows integrating prompts, external data sources, structured outputs, and reusable components for automated AI-driven analysis.
- Implemented evaluation, logging, testing, monitoring, debugging, and Docker deployment practices for reliable AI application development.

Regulatory Compliance RAG Assistant | *Python, LangChain, Hugging Face, ChromaDB* Apr 2026 – Jun 2026

- Designed a Retrieval-Augmented Generation pipeline using Python, LangChain, Hugging Face embeddings, ChromaDB, and LLM inference for domain-specific document Q&A.
- Implemented document ingestion, preprocessing, chunking, embedding generation, vector indexing, semantic retrieval, prompting, and response evaluation.
- Developed retrieval and evaluation workflows to improve grounded responses, reduce irrelevant context, and support reliable knowledge-base querying.

- Built a computer vision system using Python, YOLO, and OpenCV for real-time object detection, image preprocessing, and machine learning inference.
- Developed computer vision pipelines for image processing, model inference, detection, and performance evaluation in a real-world surveillance use case.
- Integrated FastAPI REST APIs, Docker, and AWS to expose AI inference services and support scalable backend deployment.

TECHNICAL SKILLS

Programming: Python, JavaScript, SQL, Java, C/C++

AI/ML: Machine Learning, Deep Learning, NLP, Computer Vision, PyTorch, scikit-learn, Hugging Face Transformers, YOLO, OpenCV

Generative AI: LLMs, Generative AI, RAG, Agentic AI, Prompt Engineering, OpenAI API, Embeddings, Vector Search, Tool Calling, Multi-Agent Systems

AI Frameworks: LangChain, LangGraph, FastAPI, Hugging Face Transformers

Data & Retrieval: ChromaDB, Vector Databases, Pandas, NumPy, PostgreSQL, MySQL, ETL, Data Preprocessing, Feature Engineering

Engineering & MLOps: REST APIs, Docker, Git, GitHub Actions, CI/CD, Linux, Testing, Debugging, Monitoring, Model Evaluation, AWS
