SUMMARY

Applied AI Engineer with hands-on experience building LLM applications, AI agents, RAG systems, and backend services using Python, OpenAI APIs, LangChain, LangGraph, FastAPI, REST APIs, Docker, and AWS. Experienced in agent orchestration, tool calling, prompt engineering, evaluation, monitoring, debugging, and production-oriented AI systems.

EDUCATION

Lovely Professional University

B.Tech in Computer Science and Engineering

Jalandhar, Punjab

Aug 2022 – May 2026

- **Relevant Coursework:** Data Structures, Algorithms, DBMS, AI, ML, NLP, Distributed Systems

EXPERIENCE

AI Intern

Know AI

June 2026 – Present

Ahmedabad, Gujarat

- Built LLM applications, AI agents, and RAG pipelines using Python, FastAPI, OpenAI APIs, and LangChain.
- Developed agent workflows with tool calling, structured outputs, API integrations, and multi-step orchestration.
- Implemented prompting, retrieval, evaluation, logging, and monitoring workflows to improve AI system quality.
- Debugged AI workflows, API failures, retrieval issues, and data pipelines using logs and root-cause analysis.

Data Engineer Intern

flickDone

June 2025 – Aug 2025

Remote

- Built Python and SQL data pipelines processing 50,000+ records for machine learning applications.
- Developed ingestion, transformation, validation, and automated workflows using Python, Pandas, NumPy, and SQL.
- Built backend workflows and REST API integrations using Docker, Git, Linux, and software engineering practices.
- Implemented GitHub Actions and CI/CD automation to improve development and deployment reliability.

PROJECTS

Morning Market Brief | *Python, OpenAI API, LangGraph, Docker*

Jun 2024 – Aug 2024

- Built a multi-agent AI assistant for reasoning, routing, tool calling, and multi-step task execution.
- Integrated OpenAI APIs, external tools, structured outputs, prompts, and reusable agent orchestration workflows.
- Implemented logging, testing, evaluation, and monitoring workflows to identify failures and improve agent reliability.
- Containerized the application with Docker for reproducible deployment and execution.

Regulatory Compliance RAG Assistant | *Python, LangChain, Hugging Face, ChromaDB* Apr 2026 – Jun 2026

- Built a RAG application for grounded document retrieval and LLM-based question answering.
- Implemented document ingestion, chunking, embeddings, vector search, retrieval, and context-aware prompting.
- Added evaluation workflows to assess retrieval quality and grounded LLM responses for regression detection.
- Connected retrieval, prompts, and LLM inference into reusable AI application workflows.

Smart Traffic AI Surveillance System | *Python, YOLO, OpenCV, FastAPI, AWS*

Jun 2025 – Aug 2025

- Built real-time computer vision pipelines using Python, YOLO, and OpenCV for automated object detection.
- Developed preprocessing, inference, REST API, and model-serving workflows for production-oriented AI services.
- Integrated FastAPI and Docker to build deployable backend services and reusable API workflows.
- Used AWS to support cloud-based deployment and backend integration for AI applications.

TECHNICAL SKILLS

Languages: Python, SQL, Java, JavaScript, C/C++

AI/LLM: LLMs, Generative AI, Agentic AI, RAG, OpenAI API, Prompt Engineering, Tool Calling, Embeddings, NLP

Frameworks: LangChain, LangGraph, FastAPI, PyTorch, Hugging Face, scikit-learn

Backend: REST APIs, API Integration, Docker, Git, GitHub Actions, CI/CD, Linux

Data/Cloud: AWS, ChromaDB, Vector Databases, Pandas, NumPy, PostgreSQL, MySQL, SQL

AI Engineering: AI Evaluation, Regression Testing, Monitoring, Logging, Debugging, Root-Cause Analysis, Model Optimization
