SUMMARY

Applied AI Engineer focused on building production-oriented LLM applications, agentic workflows, and RAG systems using Python, FastAPI, LangChain, and modern AI frameworks. Experienced in LLM integration, context management, AI evaluation, backend APIs, performance optimization, and Docker-based deployment, with a focus on reliable and scalable AI products.

EDUCATION

Lovely Professional University

B.Tech in Computer Science and Engineering

Jalandhar, Punjab

Aug 2022 – May 2026

- **Relevant Coursework:** Artificial Intelligence, Machine Learning, NLP, Deep Learning, Data Structures, Algorithms, DBMS, Distributed Systems

EXPERIENCE

AI Intern

Know AI

June 2026 – Present

Ahmedabad, Gujarat

- Develop production LLM applications using Python, Generative AI, RAG pipelines, and modern AI frameworks.
- Build FastAPI backend services integrating LLM capabilities with applications, APIs, and automated workflows.
- Develop agentic workflows using LangChain, prompt engineering, context management, embeddings, and tool integration.
- Implement AI testing, evaluation, experimentation, and performance optimization for reliable AI applications.
- Deploy and monitor AI services using Docker, Git, REST APIs, and production-oriented engineering workflows.

Data Engineer Intern

flickDone

June 2025 – Aug 2025

Remote (South Korea-based company)

- Built scalable Python and SQL data pipelines processing 50,000+ records for analytics and machine learning workflows.
- Developed ETL pipelines using Python, Pandas, and NumPy for data ingestion, preprocessing, validation, and transformation.
- Built reliable data workflows supporting machine learning applications and structured analytical datasets.
- Implemented automated validation and processing workflows to improve data quality, consistency, and reliability.
- Contributed to REST APIs and CI/CD workflows using GitHub, Docker, and Linux development environments.

PROJECTS

Regulatory Compliance RAG Assistant | *Python, ChromaDB, BM25, Hugging Face*

Apr 2026 – Jun 2026

- Built RAG system using Python, ChromaDB, BM25, Hugging Face, and Streamlit for regulatory document intelligence.
- Implemented hybrid retrieval combining vector search and BM25 with Reciprocal Rank Fusion for grounded retrieval.
- Integrated cross-encoder reranking and LLM workflows to generate context-aware responses with citations.
- Evaluated retrieval using Hit Rate and MRR across BM25, vector, hybrid, and reranked approaches.

AI Product Recommendation System | *Python, FastAPI, FAISS, LLMs*

Jun 2025 – Aug 2025

- Built an AI product recommendation system using Python, FastAPI, FAISS, embeddings, and LLMs.
- Implemented semantic search over SHL product metadata using BGE embeddings and FAISS retrieval.
- Integrated Claude 3 Haiku via OpenRouter to rerank retrieved products and improve recommendation relevance.
- Developed Streamlit UI and REST APIs for natural-language queries and top-3 recommendations.

Morning Market Brief | *Python, FastAPI, LangChain, Docker*

Jun 2024 – Aug 2024

- Built a finance assistant using Python, FastAPI, LangChain, Streamlit, and Hugging Face for market updates.
- Designed multi-agent workflows for data retrieval, scraping, financial analysis, and response generation.
- Implemented FAISS and LangChain retrieval for financial insights with voice input and output capabilities.
- Containerized the application using Docker for reproducible development and deployment workflows.

TECHNICAL SKILLS

Languages: Python, SQL, Java, C++

GenAI: LLMs, Generative AI, RAG, Agentic AI, Agent Orchestration, Context Management, Prompt Engineering

AI/ML: Machine Learning, Deep Learning, NLP, Model Evaluation, Retrieval Systems, AI Workflows, Benchmarking

Frameworks: LangChain, LangGraph, FastAPI, PyTorch, Scikit-learn, Hugging Face

Data & APIs: ChromaDB, Vector Databases, PostgreSQL, MySQL, Pandas, NumPy, REST APIs

Cloud & DevOps: AWS, Docker, Git, GitHub Actions, Linux, CI/CD, Deployment, Monitoring

Engineering: Backend Development, API Integration, Testing, AI Pipelines, Workflow Automation, Performance Optimization
