SUMMARY

AI Engineer with hands-on experience building machine learning, generative AI, and data applications using Python, C++, PyTorch, scikit-learn, Pandas, NumPy, SQL, LLMs, and FastAPI. Experienced in ML pipelines, model evaluation, experimentation, data processing, inference, testing, and deployment. Strong foundation in machine learning, algorithms, NLP, statistical analysis, data systems, and production AI engineering.

EDUCATION

Lovely Professional University

B.Tech in Computer Science and Engineering

Jalandhar, Punjab

Aug 2022 – May 2026

- **Relevant Coursework:** Data Structures, Algorithms, Operating Systems, DBMS, Artificial Intelligence, Machine Learning, NLP, Distributed Systems

EXPERIENCE

AI Intern

Know AI

June 2026 – Present

Ahmedabad, Gujarat

- Built machine learning and AI applications using Python, C++, PyTorch, scikit-learn, LLMs, and practical ML workflows.
- Developed data processing and inference services supporting model integration, experimentation, evaluation, and deployment.
- Designed AI workflows integrating models, embeddings, vector databases, APIs, and structured data for practical use cases.
- Implemented testing, evaluation, debugging, monitoring, and optimization to improve model reliability and system performance.

Data Engineer Intern

flickDone

June 2025 – Aug 2025

Remote (South Korea-based company)

- Built data pipelines processing 50,000+ records using Python, Pandas, NumPy, SQL, and relational database systems.
- Developed data ingestion, preprocessing, transformation, validation, and ETL workflows supporting machine learning applications.
- Optimized PostgreSQL and MySQL queries improving backend performance, data accessibility, and processing efficiency.
- Created automated validation workflows and REST APIs using Docker, GitHub Actions, Linux, and software engineering practices.

PROJECTS

Regulatory Compliance RAG Assistant | *Python, LangChain, Hugging Face, ChromaDB* Apr 2026 – Jun 2026

- Built a machine learning application using Python, embeddings, and ChromaDB for document processing and semantic retrieval.
- Implemented document preprocessing, indexing, retrieval algorithms, evaluation workflows, and LLM-based inference.
- Developed validation and experimentation workflows to measure retrieval quality and improve model response reliability.

Smart Traffic AI Surveillance System | *Python, YOLO, OpenCV, FastAPI, AWS* Jun 2025 – Aug 2025

- Built a computer vision system using Python, YOLO, and OpenCV for real-time object detection and model inference.
- Developed image preprocessing and inference pipelines supporting practical machine learning model execution.
- Integrated FastAPI, REST APIs, Docker, and AWS for scalable model deployment and system integration.

Morning Market Brief | *Python, OpenAI API, Docker, Multi-Agent AI*

Jun 2024 – Aug 2024

- Built a multi-agent AI assistant using Python and LLMs for automated reasoning, experimentation, and multi-step task execution.
- Integrated OpenAI APIs, prompts, tools, and structured workflows for applied AI problem solving.
- Implemented logging, testing, monitoring, evaluation, and Docker deployments for reproducible AI workflows.

TECHNICAL SKILLS

Languages: Python, C++, Java, SQL

AI/ML: Machine Learning, Deep Learning, Generative AI, LLMs, NLP, Computer Vision, Model Inference, Model Evaluation

ML Frameworks: PyTorch, scikit-learn, Hugging Face Transformers, YOLO, OpenCV

Algorithms & Science: Data Structures, Algorithms, Statistical Analysis, Experimentation, Feature Engineering, Model Validation

Data & Databases: Pandas, NumPy, PostgreSQL, MySQL, SQL, RDBMS, Data Pipelines, ETL, Document Processing

Engineering: FastAPI, AWS, Docker, Git, GitHub Actions, Linux, Testing, Debugging, Monitoring
