SUMMARY

Generative AI Engineer with hands-on experience building and deploying AI applications using Python, LLMs, RAG, NLP, computer vision, LangChain, LangGraph, Hugging Face Transformers, PyTorch, FastAPI, and vector databases. Experienced in prompt engineering, embeddings, agentic workflows, AI model integration, evaluation, testing, and Docker-based deployment. Strong foundation in machine learning and production-oriented AI engineering, with experience developing real-world AI systems from prototype to deployable applications.

EDUCATION

Lovely Professional University

B.Tech in Computer Science and Engineering

Jalandhar, Punjab

Aug 2022 – May 2026

- **Relevant Coursework:** Data Structures, Algorithms, DBMS, Artificial Intelligence, Machine Learning, NLP, Distributed Systems

EXPERIENCE

AI Intern

Know AI

June 2026 – Present

Ahmedabad, Gujarat

- Developed AI applications using Python, LLM APIs, LangChain, LangGraph, FastAPI, RAG pipelines, embeddings, and vector databases.
- Built LLM-powered backend services integrating retrieval, external APIs, tool calling, structured outputs, and prompt engineering for real-world AI workflows.
- Designed and prototyped agentic AI workflows for multi-step reasoning, task execution, and automated information processing.
- Implemented evaluation, testing, debugging, monitoring, and optimization workflows to improve AI application reliability, accuracy, and response quality.

Data Engineer Intern

flickDone

June 2025 – Aug 2025

Remote

- Built data pipelines processing 50,000+ records using Python, Pandas, NumPy, SQL, and automated data processing workflows.
- Developed ingestion, preprocessing, transformation, validation, and ETL pipelines supporting machine learning and data-driven applications.
- Built automated validation and deployment workflows using Docker, GitHub Actions, Git, Linux, and CI/CD engineering practices.

PROJECTS

Morning Market Brief | Python, OpenAI API, LangGraph, Docker

Jun 2024 – Aug 2024

- Built a multi-agent Generative AI application using Python and LLMs for automated reasoning, routing, tool calling, and multi-step task execution.
- Integrated OpenAI APIs, prompt engineering, structured workflows, external data sources, and agent orchestration for real-world AI automation.
- Implemented evaluation, logging, testing, monitoring, and Docker deployment practices to improve reliability and reproducibility of AI services.

Regulatory Compliance RAG Assistant | Python, LangChain, Hugging Face, ChromaDB

Apr 2026 – Jun 2026

- Built a Retrieval-Augmented Generation application using Python, LangChain, Hugging Face embeddings, ChromaDB, and LLMs for document question answering.
- Implemented document ingestion, chunking, embedding generation, vector indexing, semantic retrieval, prompting, and grounded response generation.
- Designed retrieval and evaluation workflows to improve relevance, response quality, and reliability of LLM-generated answers.

Smart Traffic AI Surveillance System | *Python, PyTorch, YOLO, OpenCV, FastAPI, AWS* Jun 2025 – Aug 2025

- Built a computer vision AI application using Python, YOLO, OpenCV, and deep learning for real-time object detection and ML inference.
- Developed image preprocessing and model inference pipelines for computer vision applications and real-world AI deployment scenarios.
- Integrated FastAPI, REST APIs, Docker, and AWS to expose AI capabilities through scalable backend services.

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript, Java, C/C++

AI/ML: Machine Learning, Deep Learning, NLP, Computer Vision, PyTorch, Scikit-learn, Hugging Face Transformers

Generative AI: LLMs, Generative AI, RAG, Prompt Engineering, Context Engineering, Embeddings, OpenAI API, Tool Calling, Agentic AI

AI Frameworks: LangChain, LangGraph, FastAPI, OpenCV, YOLO

Vector & Data: ChromaDB, FAISS, Vector Databases, Pandas, NumPy, PostgreSQL, MySQL, ETL

Cloud & Engineering: AWS, Docker, Git, GitHub Actions, CI/CD, Linux, REST APIs, Testing, Debugging, Monitoring, Model Evaluation
