

EDUCATION

Lovely Professional University
Bachelor of Technology (Computer Science & Engineering)

Jalandhar, India
July 2022 - May 2026

SKILLS SUMMARY

- **Programming:** Python, SQL, JavaScript, TypeScript, NumPy, Pandas
- **AI & ML:** Machine Learning, Deep Learning, PyTorch, Generative AI, LLMs, AI Agents, RAG, Model Evaluation
- **Data:** Data Preprocessing, Feature Engineering, Data Pipelines, PostgreSQL
- **Analytics:** Statistical Analysis, Model Evaluation, Performance Monitoring
- **AI Frameworks:** LangChain, LangGraph, FastAPI, LLM APIs
- **Engineering & Cloud:** AWS, Docker, Git, Linux, CI/CD, REST APIs, Microservices, Testing, Monitoring, Debugging, Claude Code, Codex

WORK EXPERIENCE

- AI Intern | Know AI | [LINK](#)

June 2026 - August 2026

 - Built Generative AI and LLM applications using Python, focusing on AI automation and prompt engineering.
 - Developed and tested **AI workflows and REST APIs**, integrating AI agents, tool calling, automation, RAG, and external APIs.
 - Designed information retrieval pipelines using embeddings, vector databases, semantic search, and **automated workflows**.
 - Developed LLM and agent evaluation pipelines measuring **accuracy, reliability, tool performance, and output quality**.
 - Improved AI workflow reliability through testing, monitoring, debugging, latency optimization, **automation**, and failure handling.
- Data Engineer Intern | flickDONE | [LINK](#)

June 2025 - August 2025

 - Built scalable **Python AI/ML data pipelines** processing 50,000+ records for preprocessing and feature engineering.
 - Engineered automated **data ingestion, preprocessing, and validation workflows**, reducing manual verification by 70%.
 - Optimized **AWS-based AI/ML pipelines**, improving execution speed by 25% through performance tuning.
 - Developed reusable **AI workflows, API integrations, and automation** for document processing and LLM applications.
 - Collaborated with teams to improve **workflow scalability, reliability, and deployment**.

PROJECTS

- Ledgerly — Multi-Tenant SaaS Billing Platform | [LIVE](#)

August 2026 - September 2026

 - Built a full-stack SaaS platform using Next.js, NestJS, Node.js, PostgreSQL, Docker, REST APIs, and testing.
 - Implemented tenant-isolated customer and invoice workflows with **RBAC and transactional data operations**.
 - Built **Stripe payment workflows and webhook processing** with idempotency and transactional updates.
 - Added **rate limiting, health checks, and secure error handling** for production-grade reliability.
 - Developed **174 automated tests across 21 suites** covering authentication, billing, payments, and tenant isolation.
- LangGraph Workflow Orchestrator — Agentic AI Platform | [LIVE](#)

June 2026 - August 2026

 - Built and deployed a stateful **Agentic AI platform** using Python, LangGraph, LangChain, FastAPI, and Gemini.
 - Designed **multi-step agentic workflows** with planning, task routing, tool execution, failure handling, recovery, and evaluation.
 - Developed modular components for **task decomposition, tool calling, function calling, and agent coordination**.
 - Exposed AI workflows through FastAPI REST APIs, enabling scalable deployment and integration with external services.
 - Evaluated agent workflows using evaluation datasets, multi-turn scenarios, failure analysis, and performance benchmarking.
- Production-Grade RAG Engine | [LIVE](#)

June 2026 - August 2026

 - Built an end-to-end production-grade **RAG and NLP system** using Python, FastAPI, LangChain, Qdrant, and AWS.
 - Developed document ingestion, preprocessing, **chunking strategies**, embeddings, indexing, retrieval, and response generation.
 - Implemented semantic information retrieval with Qdrant for low-latency, knowledge-grounded search.
 - Added reranking and retrieval evaluation to improve retrieval quality, context relevance, and AI response performance.
 - Improved AI service reliability through testing, monitoring, fallback handling, and error analysis.

CERTIFICATES

- Python, Data Science & ML (Cipherschools) | [CERTIFICATE](#)

August 2024

 - Built machine learning models using PyTorch and applied ML techniques for model development and evaluation.
 - Developed **Dockerized environments** supporting reproducible experimentation and deployment
- Generative AI with Large Language Models (Coursera) | [CERTIFICATE](#)

March 2024

 - Applied prompt engineering techniques for LLM applications.
 - Built **retrieval workflows, AI output evaluation, and RAG pipeline** performance validation.
