EDUCATION

Lovely Professional University

B.Tech in Computer Science and Engineering

Jalandhar, Punjab

Aug 2022 – May 2026

- **Relevant Coursework:** Data Structures, Algorithms, Operating Systems, DBMS, Computer Networks, Artificial Intelligence, Machine Learning, Distributed Systems, Computer Architecture

EXPERIENCE

AI Intern

Know AI

June 2026 – Present

Ahmedabad, Gujarat

- Built production AI applications using Python, FastAPI, PyTorch, and Large Language Models.
- Developed backend services, REST APIs, data pipelines, and AI workflows for scalable deployment.
- Designed Retrieval-Augmented Generation (RAG) pipelines using embeddings, vector databases, and LangChain.
- Implemented prompt engineering, model evaluation, monitoring, and optimization to improve AI reliability.
- Built modular AI services following production engineering, automation, and cloud deployment practices.

Data Engineer Intern

flickDone

June 2025 – Aug 2025

Remote (South Korea-based company)

- Built scalable data pipelines processing 50,000+ records using Python, Pandas, NumPy, and SQL.
- Developed data ingestion, preprocessing, transformation, and ETL workflows supporting machine learning.
- Optimized PostgreSQL and MySQL queries improving backend performance and data accessibility.
- Created automated validation and monitoring workflows improving data quality and system reliability.
- Developed REST APIs and deployed backend services using Docker, Git, GitHub Actions, and Linux.

PROJECTS

Regulatory Compliance RAG Assistant | *Python, LangChain, Hugging Face, ChromaDB* Apr 2026 – Jun 2026

- Built RAG application using LangChain, embeddings, and ChromaDB for enterprise knowledge retrieval.
- Implemented document processing, indexing, retrieval pipelines, and FastAPI inference services.
- Developed evaluation workflows measuring retrieval accuracy, response quality, and model performance.
- Applied prompt engineering techniques improving retrieval quality and AI assistant reliability.

Smart Traffic AI Surveillance System | *Python, YOLO, OpenCV, FastAPI, AWS*

Jun 2025 – Aug 2025

- Built computer vision system using YOLO, OpenCV, and Python for real-time object detection.
- Developed image preprocessing and inference pipelines supporting AI-driven analysis.
- Integrated FastAPI services for AI model deployment and backend applications.
- Containerized AI services using Docker and AWS for scalable deployment.

Morning Market Brief | *Python, OpenAI API, Docker, Multi-Agent AI*

Jun 2024 – Aug 2024

- Built multi-agent AI assistant using LLMs for reasoning, automation, and task execution.
- Integrated OpenAI APIs with prompts, tools, and structured AI workflows.
- Implemented logging, evaluation, monitoring, and testing for reliable AI systems.
- Developed Docker deployments for scalable AI backend services.

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript, TypeScript, Java, C/C++

AI/ML: Machine Learning, Generative AI, Large Language Models, RAG, AI Agents, Prompt Engineering, Embeddings, Model Evaluation

Frameworks: PyTorch, TensorFlow, LangChain, FastAPI, Hugging Face Transformers, OpenCV, Scikit-learn

Data & APIs: REST APIs, PostgreSQL, MySQL, ChromaDB, Vector Databases, Pandas, NumPy, Data Pipelines

Cloud & MLOps: AWS, Docker, Git, GitHub Actions, Linux, CI/CD, Model Deployment, Monitoring

Engineering: Backend Development, AI Systems, Production ML Systems, Object-Oriented Programming, Data Structures, Algorithms
