EDUCATION

Lovely Professional University

B.Tech in Computer Science and Engineering

Jalandhar, Punjab

Aug 2022 – May 2026

- **Relevant Coursework:** Data Structures, Algorithms, Operating Systems, DBMS, Computer Networks, Artificial Intelligence, Machine Learning, Distributed Systems, Computer Architecture

EXPERIENCE

AI Intern

Know AI

June 2026 – Present

Ahmedabad, Gujarat

- Built production AI applications using Python, FastAPI, PyTorch, Generative AI models, and LLM APIs.
- Developed backend services with APIs, data pipelines, AI workflows, and scalable deployment architectures.
- Designed GenAI solutions using RAG pipelines, embeddings, vector databases, and retrieval systems.
- Implemented evaluation, monitoring, debugging, and optimization improving AI system reliability.
- Built modular AI services using cloud deployment, automation pipelines, and production engineering practices.

Data Engineer Intern

flickDone

June 2025 – Aug 2025

Remote (South Korea-based company)

- Built scalable data pipelines processing 50,000+ records using Python, Pandas, NumPy, and SQL databases.
- Developed data ingestion, transformation, and processing workflows supporting machine learning applications.
- Optimized PostgreSQL and MySQL queries improving backend performance and data accessibility.
- Created automated validation workflows improving data quality and system reliability.
- Developed REST APIs and deployed services using Docker, Git, GitHub Actions, and Linux.

PROJECTS

Regulatory Compliance RAG Assistant | Python, LangChain, Hugging Face, ChromaDB Apr 2026 – Jun 2026

- Built GenAI RAG application using LangChain, embeddings, and ChromaDB for knowledge retrieval.
- Implemented document processing, indexing, retrieval pipelines, and FastAPI services for AI systems.
- Developed evaluation workflows measuring retrieval accuracy, response quality, and model performance.
- Applied prompt engineering and optimization techniques improving AI assistant reliability.

Smart Traffic AI Surveillance System | Python, YOLO, OpenCV, FastAPI, AWS Jun 2025 – Aug 2025

- Built computer vision AI system using YOLO, OpenCV, and Python for object detection workflows.
- Developed image processing pipelines supporting automated analysis and AI-driven decisions.
- Integrated FastAPI services for AI model deployment and backend application integration.
- Containerized AI services using Docker and AWS for scalable production environments.

Morning Market Brief | Python, OpenAI API, Docker, Multi-Agent AI Jun 2024 – Aug 2024

- Built multi-agent AI assistant using LLM APIs for reasoning, automation, and task execution.
- Integrated OpenAI APIs with prompts, tools, and structured AI workflows.
- Implemented logging, evaluation, monitoring, and testing for reliable AI applications.
- Developed Docker deployments for scalable AI services and backend operations.

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript, TypeScript, Java, C/C++

AI/ML: Generative AI, Large Language Models, RAG, AI Agents, Prompt Engineering, Embeddings, Model Evaluation, Computer Vision

Frameworks: PyTorch, LangChain, FastAPI, TensorFlow, Hugging Face Transformers, OpenCV, Scikit-learn

Data & APIs: REST APIs, Vector Databases, ChromaDB, PostgreSQL, MySQL, Pandas, NumPy, Data Pipelines

Cloud & MLOps: AWS, Docker, Git, GitHub Actions, Linux, CI/CD, Model Deployment, Monitoring

Engineering: Backend Development, AI Systems, Production ML Systems, Object-Oriented Programming, Data Structures, Algorithms
