SUMMARY

AI/ML Engineer with hands-on experience building **machine learning and AI applications, Python backend services, data pipelines, and production-oriented ML systems**. Experienced in **Python, PyTorch, scikit-learn, NumPy, Pandas, SQL, FastAPI, AWS, Docker, CI/CD, model evaluation, NLP, computer vision, and ML workflows**. Skilled in developing, evaluating, integrating, and deploying AI systems with emphasis on **reliability, performance, experimentation, validation, and scalable production workflows**.

EDUCATION

Lovely Professional University

B.Tech in Computer Science and Engineering

Jalandhar, Punjab

Aug 2022 – May 2026

- **Relevant Coursework:** Data Structures & Algorithms, Machine Learning, Artificial Intelligence, Deep Learning, NLP, Computer Vision, Distributed Systems, DBMS, Statistics

EXPERIENCE

AI Intern

Know AI

June 2026 – Present

Ahmedabad, Gujarat

- Develop **Python-based AI/ML applications and backend services** using FastAPI, PyTorch, Hugging Face, LangChain, LangGraph, and LLM APIs.
- Build and evaluate **ML and AI workflows** involving data preprocessing, model integration, inference, validation, structured evaluation, and performance analysis.
- Integrate AI models with **REST APIs, vector databases, structured data sources, and backend infrastructure** for production-oriented applications.
- Implement **testing, debugging, validation, logging, monitoring, and error handling** to improve reliability and performance of deployed AI systems.

Data Engineer Intern

flickDone

June 2025 – Aug 2025

Remote

- Built **Python and SQL data pipelines** processing **50,000+ records** for analytics and machine learning workflows.
- Developed **data ingestion, preprocessing, transformation, validation, and optimization** pipelines using Pandas, NumPy, and SQL.
- Improved **system reliability by 30%** and reduced **query latency by 25%** through data and query optimization.
- Implemented **Docker, GitHub Actions, and CI/CD** for reproducible development, automated testing, and deployment workflows.

PROJECTS

Smart Traffic AI Surveillance System | *Python, YOLO, OpenCV, FastAPI, AWS*

2025 – 2026

- Built a **real-time computer vision system** using YOLO and OpenCV for object detection and traffic surveillance from video streams.
- Developed **Python and FastAPI inference services** for integrating computer vision models with backend applications and real-time processing workflows.
- Implemented image preprocessing, model inference, detection validation, and API integration for reliable deployment of computer vision workloads.

Production-Grade RAG Engine | *Live Demo | Python, FastAPI, Qdrant, AWS, Inngest*

Jun 2026 – Aug 2026

- Built a **production-oriented ML/AI pipeline** covering document ingestion, preprocessing, embeddings, retrieval, ranking, generation, and evaluation.
- Developed **FastAPI inference and retrieval APIs** with validation, error handling, fallback execution, testing, and monitoring.

- Designed scalable processing workflows integrating **Python, vector search, AWS infrastructure, and automated execution** for AI applications.

LangGraph Workflow Orchestrator | *Live Demo* | *Python, LangGraph, FastAPI, LangChain* Aug 2026

- Built a **Python-based AI workflow execution platform** supporting stateful execution, task routing, tool integration, and controlled multi-step workflows.
- Implemented structured validation, failure handling, testing, debugging, and monitoring for reliable execution across multiple workflow patterns.

AI Product Recommendation System | *Python, FastAPI, SQL, LangChain, Docker* Jun 2025 – Aug 2025

- Built an **AI recommendation application** integrating machine learning and retrieval workflows with Python backend services and structured product data.
- Implemented **data processing, embeddings, retrieval, ranking, and recommendation workflows** for personalized product discovery.
- Containerized backend services using **Docker** for reproducible development and deployment environments.

TECHNICAL SKILLS

Programming: Python, SQL, C++, Java

Machine Learning: Machine Learning, Deep Learning, NLP, Computer Vision, Model Evaluation, Feature Engineering, ML Pipelines

Frameworks: PyTorch, scikit-learn, Hugging Face, YOLO, OpenCV, NumPy, Pandas

Generative AI: LLMs, RAG, LangChain, LangGraph, Embeddings, Vector Search, AI Agents, Prompt Engineering

Backend: FastAPI, REST APIs, Backend Services, API Integration, Async Processing

Databases: PostgreSQL, MySQL, Qdrant, ChromaDB, Vector Databases

Cloud/Infrastructure: AWS, Docker, Linux, Git, GitHub Actions, CI/CD

ML Engineering: Model Inference, Model Evaluation, ML Workflows, MLOps, Testing, Monitoring, Logging, Deployment, Performance Optimization
