SUMMARY

AI Engineer with hands-on experience building machine learning, generative AI, and agentic AI applications using Python, PyTorch, scikit-learn, Pandas, NumPy, SQL, LLMs, RAG, and FastAPI. Experienced in ML pipelines, prompt engineering, model evaluation, testing, monitoring, API integration, and deployment. Strong foundation in machine learning, NLP, retrieval systems, data pipelines, LLM orchestration, and production AI engineering.

EDUCATION

Lovely Professional University

B.Tech in Computer Science and Engineering

Jalandhar, Punjab

Aug 2022 – May 2026

- **Relevant Coursework:** Data Structures, Algorithms, Operating Systems, DBMS, Artificial Intelligence, Machine Learning, NLP, Distributed Systems

EXPERIENCE

AI Intern

Know AI

June 2026 – Present

Ahmedabad, Gujarat

- Built AI applications using Python, FastAPI, PyTorch, LLMs, RAG, and agentic AI workflows for practical use cases.
- Developed REST APIs and AI services supporting model integration, document processing, retrieval, inference, and deployment.
- Designed LLM workflows integrating prompts, embeddings, vector databases, tools, external APIs, and structured workflows.
- Implemented model and LLM evaluation, testing, monitoring, debugging, and optimization to improve reliability and response quality.

Data Engineer Intern

flickDone

June 2025 – Aug 2025

Remote (South Korea-based company)

- Built data pipelines processing 50,000+ records using Python, Pandas, NumPy, SQL, and structured data workflows.
- Developed data ingestion, preprocessing, transformation, validation, and ETL pipelines supporting machine learning applications.
- Optimized PostgreSQL and MySQL queries improving backend performance, data accessibility, and processing efficiency.
- Created automated validation workflows and REST APIs using Docker, GitHub Actions, Linux, and software engineering practices.

PROJECTS

Regulatory Compliance RAG Assistant | *Python, LangChain, Hugging Face, ChromaDB* Apr 2026 – Jun 2026

- Built a RAG application using Python, LangChain, embeddings, and ChromaDB for document preprocessing and semantic retrieval.
- Implemented document indexing, chunking, retrieval pipelines, LLM workflows, and prompt-based response generation.
- Developed evaluation workflows and validation techniques to measure retrieval quality and improve LLM response reliability.

Smart Traffic AI Surveillance System | *Python, YOLO, OpenCV, FastAPI, AWS*

Jun 2025 – Aug 2025

- Built a computer vision system using Python, YOLO, and OpenCV for real-time object detection and ML inference.
- Developed image preprocessing and model inference pipelines supporting practical machine learning applications.
- Integrated FastAPI, REST APIs, Docker, and AWS for scalable model deployment and backend integration.

- Built a multi-agent AI assistant using Python and LLMs for automated reasoning, tool usage, and multi-step task execution.
- Integrated OpenAI APIs, prompts, tools, and structured workflows for agentic GenAI applications.
- Implemented logging, testing, monitoring, evaluation, and Docker deployments for reliable AI service operation.

TECHNICAL SKILLS

Languages: Python, SQL, Java, C/C++

AI/ML: Machine Learning, Deep Learning, Generative AI, LLMs, NLP, Computer Vision, RAG, Model Evaluation, Prompt Engineering

ML Frameworks: PyTorch, scikit-learn, Hugging Face Transformers, YOLO, OpenCV

GenAI: LangChain, LangGraph, LLM Applications, Embeddings, Vector Databases, ChromaDB, Multi-Agent Systems

Data & APIs: Pandas, NumPy, PostgreSQL, MySQL, REST APIs, Data Pipelines, ETL, Document Processing

Engineering: FastAPI, AWS, Docker, Git, GitHub Actions, Linux, Testing, Debugging, Monitoring
