SUMMARY

Data Scientist experienced in Python, SQL, data cleaning, preprocessing, analysis, validation, and machine learning workflows. Skilled in preparing datasets, exploratory analysis, feature engineering, model evaluation, and reliable data processing workflows.

EDUCATION

Lovely Professional University

B.Tech in Computer Science and Engineering

Jalandhar, Punjab

Aug 2022 – May 2026

- **Relevant Coursework:** Data Structures, Algorithms, DBMS, AI, ML, Statistics, Data Analysis, NLP, Distributed Systems

EXPERIENCE

AI Intern

Know AI

June 2026 – Present

Ahmedabad, Gujarat

- Processed datasets using Python, Pandas, NumPy, and SQL for machine learning workflows.
- Performed data cleaning, preprocessing, standardization, validation, and quality checks for consistent datasets.
- Prepared structured datasets and features for model training, prediction, and evaluation workflows.
- Investigated data quality issues through exploratory analysis, debugging, validation, and root-cause analysis.

Data Engineer Intern

flickDone

June 2025 – Aug 2025

Remote

- Built Python and SQL data pipelines processing 50,000+ records for machine learning applications.
- Developed data collection, ingestion, cleaning, transformation, preprocessing, and validation workflows using Pandas.
- Optimized PostgreSQL and MySQL queries for reliable databases and downstream data analysis.
- Implemented automated data validation and CI/CD workflows using GitHub Actions and Docker.

PROJECTS

Morning Market Brief | *Python, Pandas, NumPy, SQL*

Jun 2024 – Aug 2024

- Built Python application for collecting, cleaning, processing, analyzing, and summarizing financial information.
- Applied preprocessing, transformations, validation, and exploratory analysis to generate reliable financial insights.
- Used Pandas and NumPy to organize datasets and prepare structured analytical outputs.

Regulatory Compliance RAG Assistant | *Python, Pandas, NumPy, ChromaDB*

Apr 2026 – Jun 2026

- Built document processing application involving data ingestion, cleaning, transformation, validation, and retrieval workflows.
- Implemented validation workflows evaluating data quality, consistency, and retrieval results across processed documents.
- Analyzed structured and unstructured data supporting reliable downstream analytics and machine learning workflows.

Smart Traffic AI Surveillance System | *Python, YOLO, OpenCV, Pandas*

Jun 2025 – Aug 2025

- Built machine learning pipelines processing real-time traffic data using Python and YOLO.
- Developed preprocessing, data handling, feature preparation, and validation workflows using Pandas.
- Evaluated model outputs and analyzed detection results supporting predictive modeling performance.

TECHNICAL SKILLS

Languages: Python, SQL, Java, JavaScript, C/C++

Data Science: Data Collection, Data Cleaning, Data Preprocessing, Data Analysis, Exploratory Data Analysis, Feature Engineering, Statistics, Data Validation

Python/Data: Pandas, NumPy, scikit-learn, Matplotlib, Excel, Streamlit

Machine Learning: Machine Learning, Predictive Modeling, Model Training, Model Evaluation, PyTorch, XGBoost

Databases: PostgreSQL, MySQL, SQL, ChromaDB, Vector Databases

Tools: Git, GitHub Actions, Docker, Linux, AWS

AI/ML: NLP, Generative AI, LLMs, RAG, Embeddings
