SUMMARY

Software Engineer with experience building **backend applications, AI-powered tools, data workflows, and REST APIs** using Python, SQL, FastAPI, Git, Docker, and modern AI frameworks. Strong foundation in **software engineering, databases, APIs, testing, troubleshooting, and data structures**, with hands-on experience applying AI tools to build practical solutions and automate workflows.

EDUCATION

Lovely Professional University

B.Tech in Computer Science and Engineering

Jalandhar, Punjab

Aug 2022 – May 2026

- **Relevant Coursework:** Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Distributed Systems, Software Engineering, Machine Learning

EXPERIENCE

AI Intern

Know AI

June 2026 – Present

Ahmedabad, Gujarat

- Build **Python applications, REST APIs, AI workflows, and backend services** using FastAPI, LangChain, LangGraph, and LLM APIs.
- Develop and test **application workflows** involving APIs, structured data, retrieval systems, validation, and automated processing.
- Investigate application issues through **logging, debugging, regression testing, evaluation, and systematic troubleshooting** to improve reliability.
- Collaborate on **AI-assisted software solutions** integrating backend services, vector databases, external APIs, and structured data.

Data Engineer Intern

flickDone

June 2025 – Aug 2025

Remote

- Built **Python and SQL data pipelines** processing **50,000+ records** for analytics and machine learning workflows.
- Developed data ingestion, preprocessing, validation, and transformation workflows using **Pandas, NumPy, Python, and SQL**.
- Improved **system reliability by 30%** and reduced **query latency by 25%** through workflow and query optimization.
- Implemented **Docker, GitHub Actions, Git, and CI/CD** for reproducible testing and software delivery workflows.

PROJECTS

Production-Grade RAG Engine | *Live Demo* | *Python, FastAPI, Gemini, Qdrant, Inngest* Jun 2026 – Aug 2026

- Built and deployed a **Python web application** with FastAPI for document processing, retrieval, validation, and LLM-powered question answering.
- Designed **REST API services and event-driven workflows** for document ingestion, retrieval, response generation, and fallback execution.
- Implemented **testing, retrieval evaluation, grounding checks, and error handling** to improve application quality and reliability.

Morning Market Brief | *Python, LangGraph, LangChain, OpenAI API, Docker*

Jun 2024 – Aug 2024

- Built a **Python application** integrating external APIs, LLM services, retrieval, and multi-step workflows for financial research.
- Implemented **tool calling, structured outputs, task routing, and validation** across multiple application workflows.
- Added **logging, testing, evaluation, and monitoring** to identify workflow failures and improve application reliability.

Regulatory Compliance RAG Assistant | *Live Demo* | *Python, LangChain, Hugging Face, ChromaDB* Apr 2026 – Jun 2026

- Developed a **Python application** for document processing, semantic search, retrieval, and grounded question answering.
- Implemented **document ingestion, embeddings, vector search, and context-aware retrieval** using ChromaDB.
- Added **response validation, regression testing, and retrieval evaluation** to identify issues and improve application quality.

TECHNICAL SKILLS

Programming: Python, SQL, JavaScript, Java

Software Engineering: Data Structures & Algorithms, Object-Oriented Programming, Debugging, Testing, Troubleshooting, Agile Development

Backend: FastAPI, REST APIs, JSON, Backend Services, API Integration

AI: Generative AI, LLMs, RAG, AI Agents, Tool Calling, Prompt Engineering, AI-Assisted Development

Databases: SQL, PostgreSQL, ChromaDB, Qdrant, Vector Databases

Data: Pandas, NumPy, Data Pipelines, Data Validation, Data Processing

Tools: Git, GitHub Actions, Docker, CI/CD, AWS, LangChain, LangGraph, Hugging Face
