SUMMARY

AI/ML Engineer building **production AI systems, agentic workflows, and backend applications** using Python, LangGraph, LangChain, FastAPI, and AWS. Experienced in **LLM applications, APIs, RAG, tool calling, databases, Docker, CI/CD, debugging, evaluation, and deployment**, with hands-on experience building reliable systems independently in fast-moving environments.

EDUCATION

Lovely Professional University <i>B.Tech in Computer Science and Engineering</i>	Jalandhar, Punjab <i>Aug 2022 – May 2026</i>
• Relevant Coursework: Artificial Intelligence, Machine Learning, Data Structures & Algorithms, Distributed Systems, DBMS, Computer Networks	

EXPERIENCE

AI Intern <i>Know AI</i>	June 2026 – Present <i>Ahmedabad, Gujarat</i>
• Build LLM applications and agentic workflows using Python, LangChain, LangGraph, FastAPI, and Hugging Face. • Develop multi-step agent systems with tool calling, task routing, structured outputs, state management, and APIs. • Integrate AI systems with REST APIs, vector databases, backend services, and external data sources. • Implement evaluation, debugging, validation, logging, monitoring, and regression testing for reliable production workflows.	
Data Engineer Intern <i>flickDone</i>	June 2025 – Aug 2025 <i>Remote</i>
• Built Python and SQL data pipelines processing 50,000+ records for analytics and machine learning. • Developed data ingestion, preprocessing, validation, transformation, and optimization workflows using Pandas, NumPy, and SQL. • Improved system reliability by 30% and reduced query latency by 25% through optimization. • Implemented Docker, GitHub Actions, and CI/CD for reproducible testing, deployment, and automated workflows.	

PROJECTS

LangGraph Workflow Orchestrator <i>Live Demo</i> <i>Python, LangGraph, LangChain, Gemini, Chainlit</i>	Aug 2026
• Built a production-oriented agent platform for task routing, workflow orchestration, tool calling, and execution. • Developed reusable agent, node, and workflow abstractions with structured state and controlled execution. • Implemented validation, error handling, testing, monitoring, and debugging across multiple agent workflow patterns.	
Production-Grade RAG Engine <i>Live Demo</i> <i>Python, FastAPI, Gemini, Qdrant, AWS, Inngest</i>	Jun 2026 – Aug 2026
• Built a production-oriented RAG system covering ingestion, embeddings, retrieval, ranking, generation, and evaluation. • Developed FastAPI REST APIs with semantic search, backend integration, structured workflows, and scalable execution. • Implemented retrieval evaluation, response validation, fallback execution, error handling, and testing for reliability.	
Regulatory Compliance RAG Assistant <i>Live Demo</i> <i>Python, LangChain, Hugging Face, ChromaDB</i>	Apr 2026 – Jun 2026

- Developed a **domain-specific RAG assistant** using LangChain, transformers, embeddings, and semantic search.
- Implemented **document ingestion, chunking, retrieval, context-aware prompting, and similarity search** using ChromaDB.
- Added **response validation, hallucination controls, retrieval evaluation, and regression testing** for reliable generation.

TECHNICAL SKILLS

Programming: Python, SQL, JavaScript, Java

AI/GenAI: LLMs, Generative AI, Agentic AI, Prompt Engineering, Tool Calling, RAG

AI Frameworks: LangGraph, LangChain, Hugging Face, FastAPI, PyTorch, scikit-learn

LLM Platforms: Gemini, OpenAI APIs, Claude APIs

Backend: REST APIs, Backend Services, API Integration, Async Processing

Cloud/DevOps: AWS, Docker, Git, GitHub Actions, CI/CD, Linux

Data/Databases: SQL, PostgreSQL, Vector Databases, ChromaDB, Qdrant, Data Pipelines

Systems: Distributed Systems, Networking, Debugging, Testing, Monitoring, Logging, Error Handling
