EDUCATION

Lovely Professional University

B.Tech in Computer Science and Engineering

Jalandhar, Punjab

Aug 2022 – May 2026

- **Relevant Coursework:** Data Structures, Algorithms, Operating Systems, DBMS, Computer Networks, Artificial Intelligence, Machine Learning, NLP, Distributed Systems, Statistical Analysis

EXPERIENCE

AI Intern

Know AI

June 2026 – Present

Ahmedabad, Gujarat

- Built machine learning workflows using Python, AI models, feature processing, and model evaluation pipelines.
- Developed data services and REST APIs integrating ML applications, analytics workflows, and automation solutions.
- Designed ML pipelines using embeddings, data processing, and structured feature engineering workflows.
- Built model evaluation pipelines performing validation, error analysis, experimentation, and optimization.
- Improved model reliability through debugging, monitoring, performance analysis, and scalable deployment workflows.

Data Engineer Intern

flickDone

June 2025 – Aug 2025

Remote (South Korea-based company)

- Built scalable data pipelines processing 50,000+ records using Python (NumPy, Pandas) and SQL for analytics workflows
- Designed ETL pipelines for data ingestion, preprocessing, validation, and automated data transformation
- Optimized PostgreSQL and MySQL queries improving database performance, indexing, and analytical retrieval
- Built automated validation frameworks ensuring reliable datasets for machine learning applications
- Contributed to REST APIs and CI/CD backend workflows using GitHub, Docker, and Linux deployments

PROJECTS

Regulatory Compliance RAG Assistant | Python, LangChain, Hugging Face

Apr 2026 – Jun 2026

- Built an ML assistant using Python, LangChain, Hugging Face, and ChromaDB frameworks for data workflows
- Implemented semantic search with vector embeddings and efficient information retrieval pipelines
- Optimized ML pipelines for reliable retrieval and improved model response quality consistently
- Developed monitoring workflows for model validation, performance analysis, and evaluation metrics

AI Recommendation System | Python, FastAPI, Docker, LangChain, Prisma

Jun 2025 – Aug 2025

- Built an AI recommendation system using Python, FastAPI, and LangChain with data workflows efficiently
- Integrated data pipelines and Prisma for scalable processing workflows and analytical applications
- Developed REST APIs supporting model workflows, predictions, and backend integrations seamlessly
- Containerized applications using Docker for reliable deployment and scalable AI services

Morning Market Brief | Python, OpenAI API, Docker, Multi-Agent AI

Jun 2024 – Aug 2024

- Built a data-driven AI system for automated financial information generation and analysis workflows
- Integrated OpenAI APIs for intelligent summarization, reasoning, and analytical insights capabilities
- Implemented workflow monitoring with execution logging and performance tracking mechanisms
- Containerized AI services using Docker for scalable production deployments and automation

TECHNICAL SKILLS

Languages: Python, Java, C/C++, SQL (Postgres), JavaScript

Frameworks: FastAPI, Flask, Scikit-learn, LangChain, LangGraph, React, Node.js

Developer Tools: Git, Docker, GitHub Actions, Azure OpenAI, Azure Blob Storage, VS Code, Linux

Libraries: Hugging Face, pandas, NumPy, PyTorch, Pydantic, Matplotlib
