SUMMARY

GenAI Developer with hands-on experience building LLM-powered applications, RAG pipelines, REST APIs, and AI workflows using Python, FastAPI, LangChain, Hugging Face, and vector databases. Experienced in document ingestion, preprocessing, embeddings, retrieval, prompt engineering, assistant workflows, model evaluation, testing, and API integrations. Strong foundation in machine learning and data engineering with practical experience developing, testing, and deploying reliable GenAI applications using Docker, Git, CI/CD, and cloud technologies.

EDUCATION

Lovely Professional University

B.Tech in Computer Science and Engineering

Jalandhar, Punjab

Aug 2022 – May 2026

- **Relevant Coursework:** Artificial Intelligence, Machine Learning, NLP, Deep Learning, Data Structures, Algorithms, DBMS, Distributed Systems, Computer Networks

EXPERIENCE

AI Intern

Know AI

June 2026 – Present

Ahmedabad, Gujarat

- Built LLM-powered applications using Python, FastAPI, Hugging Face, LangChain, and REST APIs for enterprise workflows.
- Implemented RAG pipelines covering document processing, embeddings, vector retrieval, context construction, and LLM response generation.
- Developed assistant workflows integrating LLM APIs, databases, external services, tools, and structured application data.
- Implemented prompt engineering, evaluation, testing, regression checks, debugging, and monitoring to improve assistant reliability.
- Collaborated on iterative AI development using Git, Docker, APIs, and feedback-driven engineering workflows.

Data Engineer Intern

flickDone

June 2025 – Aug 2025

Remote (South Korea-based company)

- Built scalable Python and SQL data pipelines processing 50,000+ records for analytics and machine learning workflows.
- Developed data ingestion, preprocessing, transformation, validation, and ETL workflows using Python, Pandas, and NumPy.
- Optimized PostgreSQL and MySQL queries to improve backend performance and structured data accessibility.
- Created automated validation and testing workflows improving data quality, consistency, and downstream application reliability.
- Developed REST APIs and backend services using Docker, Git, GitHub Actions, and Linux environments.

PROJECTS

Regulatory Compliance RAG Assistant | *Python, LangChain, Hugging Face, ChromaDB* Apr 2026 – Jun 2026

- Built a RAG application using Python, LangChain, Hugging Face, embeddings, and ChromaDB for document question answering.
- Implemented document ingestion, preprocessing, chunking, embedding generation, indexing, and vector retrieval pipelines for regulatory documents.
- Integrated BM25, hybrid retrieval, reranking, and LLM generation to improve relevant context and grounded responses.
- Developed evaluation workflows measuring retrieval quality and response behavior using Hit Rate and Mean Reciprocal Rank.

AI Product Recommendation System | *Python, FastAPI, FAISS, LLMs*

Jun 2025 – Aug 2025

- Built an LLM-powered recommendation application using Python, FastAPI, FAISS, embeddings, and REST APIs.
- Implemented product data processing, embedding generation, vector indexing, semantic retrieval, and candidate ranking workflows.
- Integrated Claude 3 Haiku through OpenRouter for LLM-based candidate reranking and recommendation generation.
- Developed application interfaces and evaluation workflows for testing retrieval relevance and recommendation behavior across queries.

Morning Market Brief | *Python, FastAPI, LangChain, Docker*

Jun 2024 – Aug 2024

- Built an LLM-powered financial assistant using Python, FastAPI, LangChain, Hugging Face, and external data sources.
- Developed agent workflows for information retrieval, data processing, financial analysis, and response generation.
- Integrated APIs, retrieval components, prompts, and structured workflows for automated financial information processing.
- Containerized backend services using Docker and implemented testing workflows for reproducible application development.

TECHNICAL SKILLS

Languages: Python, SQL, Java, C/C++

GenAI: LLMs, Generative AI, RAG, Prompt Engineering, Function Calling, Tool Integration, Assistant Workflows, Model Evaluation

RAG & Retrieval: Embeddings, Vector Databases, ChromaDB, FAISS, BM25, Hybrid Retrieval, Reranking, Document Processing

Frameworks: LangChain, LangGraph, Hugging Face, PyTorch, scikit-learn, FastAPI

Data & APIs: Pandas, NumPy, PostgreSQL, MySQL, REST APIs, JSON, ETL, Data Pipelines, API Integration

Cloud & DevOps: AWS, Docker, Git, GitHub Actions, Linux, CI/CD, Deployment, Monitoring

Engineering: Backend Development, Testing, Regression Testing, Debugging, Workflow Automation, Performance Optimization
