EDUCATION

Lovely Professional University
Bachelor of Technology (Computer Science & Engineering)

Jalandhar, India
July 2022 - May 2026

SKILLS SUMMARY

- **Programming:** Python, SQL
- **Data:** Pinecone, Snowflake, Databricks, Pipelines
- **Analytics:** Fraud Detection, Model Evaluation, NLP
- **Tools:** FastAPI, PyTorch, Docker, AWS
- **Methodologies:** GenAI, RAG, LLMOps, MLOps, CI/CD, AI Workflows
- **Core Skills:** Agentic Payments, Risk Intelligence, Agentic AI, Orchestration

WORK EXPERIENCE

DATA ENGINEER INTERN | flickDONE | [LINK](#)

June 25- August 25

- Built scalable machine learning pipelines for parallel NLP text classification across fifty thousand datasets.
- Engineered Python tokenization routines for reconciliation workflows, reducing manual verification by seventy percent.
- Optimized cloud data pipeline architectures on AWS infrastructure, increasing execution speeds by twenty-five percent.
- Managed Generative AI and LLM pipelines, improving risk intelligence scalability and backend platform interpretability.
- Collaborated cross-functionally to deploy conversational AI architectures, tool-using agents, and automated AI workflows.

PROJECTS

Regulatory Compliance RAG Assistant | [LINK](#)

April 26- June 2026

- Developed Hugging Face classification workflows, boosting zero-shot fraud detection accuracy by 30%.
- Built asynchronous ChromaDB layers, boosting real-time risk intelligence search and routing efficiency by fifty percent.
- Implemented Python MLOps pipelines, cutting RAG framework latency by 50%.
- Created validation dashboards, cutting automated text analysis processing times by 40%.

AI Search & Recommendation Platform | [LINK](#)

June 25- August 2025

- Designed Python-based LLM processing workflows and analytics dashboards to monitor token usage and model performance.
- Implemented Databricks infrastructure using Prisma, decreasing conversational agent routing latency by thirty-five percent.
- Engineered REST streaming APIs using FastAPI for transaction workflows, AI orchestration, and automated agent workflows.
- Deployed Docker architectures, accelerating pipeline reliability for agentic payments by 25%.

Rails TODO App | [LINK](#)

September 24- November 2024

- Developed a full-stack Todo application using Ruby on Rails, following MVC architecture and software engineering principles.
- Implemented user authentication, session management, and authorization to provide secure access to user-specific data.
- Implemented CRUD functionalities for task management with due dates, priorities, and keywords.
- Built responsive user interfaces using Bootstrap and Bootswatch and configured the application for Heroku deployment.

Morning Market Brief | [LINK](#)

June 24- August 2024

- Built automated Python workflows, reducing conversational AI vector embedding data ingestion latency by forty-five percent.
- Applied structured validation modules, increasing LLM prompt tracking transparency and quality monitoring for users.
- Automated OpenAI API integrations, eliminating manual workflows for complex agent automations.
- Containerized components using Docker, ensuring rapid model deployment and scalable agentic AI architectures.

CERTIFICATES

Python, Data Science & ML (Cipherschools) | [CERTIFICATE](#)

August 2024

- Developed automated ML architectures, optimizing text classification metrics by 25% using PyTorch.
- Designed Docker testing environments, upgrading deep learning isolation, deployment pipelines, and solution quality.

Generative AI with LLMs (Coursera) | [CERTIFICATE](#)

March 2024

- Applied advanced few-shot prompt engineering to LLMs, streamlining conversational intelligence data pipelines.
- Implemented database logic to improve visibility in RAG frameworks and AI workflows.
