SUMMARY

AI/ML Engineer with hands-on experience building and deploying **Python-based AI applications, backend services, ML pipelines, computer vision systems, and production-oriented AI solutions**. Experienced in **Python, C++, FastAPI, machine learning, computer vision, REST APIs, data processing, Docker, AWS, CI/CD, testing, debugging, monitoring, and system integration**, with a strong focus on reliable AI applications, troubleshooting, and adapting technical systems to real-world requirements.

EDUCATION

Lovely Professional University

B.Tech in Computer Science and Engineering

Jalandhar, Punjab

Aug 2022 – May 2026

- **Relevant Coursework:** Data Structures & Algorithms, Machine Learning, Artificial Intelligence, Computer Vision, Distributed Systems, DBMS, Computer Networks, Statistics

EXPERIENCE

AI Intern

Know AI

June 2026 – Present

Ahmedabad, Gujarat

- Build and integrate **Python-based AI applications, backend services, REST APIs, and ML workflows** using FastAPI, LangGraph, LangChain, Hugging Face, and LLM APIs.
- Develop **AI application workflows and system integrations** connecting models with structured data, vector databases, external APIs, and application services.
- Implement **testing, debugging, validation, logging, monitoring, error handling, and failure analysis** to improve reliability of deployed AI systems.
- Collaborate on **technical requirements, system integration, deployment, troubleshooting, and workflow implementation** across AI and backend applications.

Data Engineer Intern

flickDone

June 2025 – Aug 2025

Remote

- Built **Python and SQL data pipelines** processing **50,000+** records for analytics and machine learning workflows.
- Developed **data ingestion, preprocessing, validation, transformation, feature preparation, and optimization** pipelines using Pandas, NumPy, and SQL.
- Improved **system reliability by 30%** and reduced **query latency by 25%** through data and query optimization.
- Implemented **Docker, GitHub Actions, CI/CD, automated testing, debugging, and deployment workflows** for reproducible engineering environments.

PROJECTS

Smart Traffic AI Surveillance System | *Python, YOLO, OpenCV, FastAPI, AWS*

2025 – 2026

- Built a **real-time computer vision AI system** using Python, YOLO, OpenCV, and FastAPI for object detection and traffic surveillance applications.
- Developed **AI inference and backend integration workflows** for processing visual data and exposing model functionality through REST APIs.
- Implemented **real-time processing, validation, debugging, error handling, and performance-focused workflows** for reliable AI application operation.
- Integrated the application with **AWS-based infrastructure** and backend services for deployment-oriented execution.

Production-Grade RAG Engine | *Live Demo* | *Python, FastAPI, Qdrant, AWS, Inngest*

Jun 2026 – Aug 2026

- Built a **production-oriented AI application** covering document ingestion, preprocessing, embeddings, retrieval, ranking, generation, and evaluation.

- Developed **FastAPI backend services and REST APIs** for AI inference, retrieval, system integration, and scalable execution.
- Implemented **validation, error handling, fallback execution, testing, monitoring, and logging** for reliable application operation.

LangGraph Workflow Orchestrator | *Live Demo* | *Python, C++, LangGraph, FastAPI, LangChain* Aug 2026

- Built a **Python-based workflow execution platform** for task routing, stateful execution, tool integration, and AI workflow orchestration.
- Developed reusable **backend abstractions, APIs, controlled execution workflows, and structured state management** with robust error handling.
- Implemented **testing, debugging, validation, monitoring, and failure analysis** across multiple workflow execution patterns.

AI Product Recommendation System | *Python, FastAPI, SQL, LangChain, Docker* Jun 2025 – Aug 2025

- Built a **Python-based AI application** integrating recommendation workflows with backend services, APIs, and structured data.
- Implemented **data processing, embeddings, retrieval, and recommendation pipelines** for personalized product discovery.
- Containerized backend services using **Docker** for reproducible development, testing, and deployment environments.

TECHNICAL SKILLS

Programming: Python, C++, SQL, Java, JavaScript

AI/ML: Machine Learning, Deep Learning, Computer Vision, NLP, YOLO, OpenCV, PyTorch, scikit-learn, Hugging Face

AI Applications: LLMs, RAG, LangChain, LangGraph, AI Agents, Embeddings, Vector Search, Model Evaluation

Backend: FastAPI, REST APIs, Backend Services, API Integration, Async Processing, Service Integration

Data: Pandas, NumPy, SQL, PostgreSQL, MySQL, Data Processing, Feature Engineering, Data Pipelines

Infrastructure: AWS, Docker, Linux, Git, GitHub Actions, CI/CD, Deployment

ML Engineering: Model Serving, ML Workflows, Monitoring, Logging, Testing, Debugging, Error Handling, Performance Optimization

Engineering: System Integration, Troubleshooting, API Integration, Distributed Systems, Reproducibility
