SUMMARY

AI Engineer with hands-on experience building **LLM-powered products, AI agents, workflow automation, RAG systems, and production-oriented AI services**. Experienced in **Python, LangGraph, LangChain, FastAPI, LLM APIs, tool calling, prompt engineering, structured outputs, retrieval, evaluation, observability, and backend systems**, with a focus on making AI workflows reliable, measurable, and useful in real-world applications.

EDUCATION

Lovely Professional University

B.Tech in Computer Science and Engineering

Jalandhar, Punjab

Aug 2022 – May 2026

- **Relevant Coursework:** Data Structures & Algorithms, Machine Learning, Artificial Intelligence, NLP, Distributed Systems, DBMS, Statistics

EXPERIENCE

AI Intern

Know AI

June 2026 – Present

Ahmedabad, Gujarat

- Build **LLM-powered applications, AI agents, RAG pipelines, and workflow automations** using Python, LangGraph, LangChain, FastAPI, Hugging Face, and LLM APIs.
- Design **multi-step agent workflows, tool calling, structured outputs, state management, prompts, and context construction** for reliable AI task execution.
- Implement **evaluation, validation, logging, monitoring, error handling, and fallback mechanisms** to identify failures and improve AI workflow reliability.
- Integrate AI systems with **APIs, vector databases, structured data, and backend services** and support testing, debugging, and production deployment.

Data Engineer Intern

flickDone

June 2025 – Aug 2025

Remote

- Built **Python and SQL data pipelines** processing **50,000+** records for analytics and machine learning workflows.
- Developed **data ingestion, preprocessing, validation, transformation, and feature preparation** pipelines using Pandas, NumPy, and SQL.
- Improved **system reliability by 30%** and reduced **query latency by 25%** through data and query optimization.
- Implemented **Docker, GitHub Actions, CI/CD, automated testing, and deployment workflows** for reproducible engineering environments.

PROJECTS

LangGraph Workflow Orchestrator | *Live Demo* | *Python, LangGraph, LangChain, FastAPI, Gemini* Aug 2026

- Built a **stateful agent orchestration platform** for multi-step task execution, tool integration, routing, structured outputs, and workflow automation.
- Designed reusable **agent nodes, state management, tool interfaces, validation, error recovery, and controlled execution** for reliable workflows.
- Implemented **FastAPI APIs, testing, monitoring, debugging, and workflow evaluation** across multiple agent execution patterns.

Production-Grade RAG Engine | *Live Demo* | *Python, FastAPI, Qdrant, LangChain, AWS* Jun 2026 – Aug 2026

- Built a **production-oriented RAG application** covering ingestion, embeddings, retrieval, ranking, generation, and evaluation.
- Implemented **retrieval evaluation, validation, fallback execution, logging, monitoring, and error handling** to improve AI system reliability.

- Developed backend services integrating **LLMs, vector search, structured data, and application APIs** for scalable AI workflows.

AI Product Recommendation System | *Python, FastAPI, LangChain, OpenAI, Docker* Jun 2025 – Aug 2025

- Built an **LLM-powered product recommendation application** integrating prompts, embeddings, retrieval, structured data, and backend APIs.
- Developed **retrieval and recommendation workflows** with validation and error handling for reliable AI-assisted user experiences.
- Containerized backend services using **Docker** for reproducible development, testing, and deployment.

TECHNICAL SKILLS

Programming: Python, SQL, Java, C++, JavaScript, TypeScript

Agentic AI: AI Agents, Agent Orchestration, LangGraph, LangChain, Tool Calling, Workflow Automation, Stateful Workflows

LLM Systems: LLMs, Prompt Engineering, Context Construction, Structured Outputs, RAG, Embeddings, Vector Search, LLM APIs

Evaluation: AI Evaluation, Retrieval Evaluation, Validation, Regression Testing, Feedback Loops, Monitoring, Observability

Backend: FastAPI, REST APIs, Backend Services, API Integration, Async Processing, Pydantic

Data: Pandas, NumPy, SQL, Data Processing, Data Pipelines, Data Validation

Databases: Qdrant, ChromaDB, PostgreSQL, MySQL, Vector Databases

Infrastructure: AWS, Docker, Linux, Git, GitHub Actions, CI/CD, Deployment

Engineering: Testing, Debugging, Error Handling, Performance Optimization, System Design
